

ANNAMACHARYA UNIVERSITY

**(Estd. A.P. Private Universities (Establishment and Regulation) Act, 2016)
(University listed in UGC as per section 2(f) of the UGC Act, 1956)**

RAJAMPET-516126, Annamayya District, A.P, INDIA

ACADEMIC REGULATIONS (AU24), COURSE STRUCTURE AND SYLLABI

For the students admitted to

**B. Tech., Regular Four-Year Undergraduate Degree Programme from the
Academic Year 2024-25, B.Tech., Honors and Minors**

and

B. Tech., Lateral Entry Scheme from the Academic Year 2025-26

VISION AND MISSION OF THE UNIVERSITY

VISION

To be a globally recognized university by providing value-based education and promoting innovation and research for societal betterment

MISSION

The mission of the University is:

1. To embody 'Vidwan Sarvatra Pujiyathay'.
2. To deliver high-quality education by encouraging research, innovation, and critical thinking
3. To nurture upright individuals by fostering an inclusive environment and inspiring service to society

ACADEMIC RULES AND REGULATIONS OF FOUR-YEAR B. TECH REGULAR DEGREE PROGRAMME

**APPLICABLE FOR THE STUDENT BATCHES ADMITTED FROM THE ACADEMIC YEAR 2024-25
APPLICABLE FOR THE STUDENTS (Lateral Entry) ADMITTED FROM THE ACADEMIC YEAR 2025-26**

CONTENTS

1. Preamble
2. Regulations Commencement
3. Eligibility for Admission
 - 3.1 Admission into Engineering Undergraduate Programmes (Regular)
 - 3.2 Admission into Second Year (Lateral Entry Scheme)

1. PREAMBLE

Annamacharya University, is a private University, established under the brownfield category as per the Andhra Pradesh Private Universities (Establishment and Regulation) Act of 2016 (Act No. 3 of 2016), subsequently amended by Act No. 2 of 2024, as published in the Extraordinary Gazette of Andhra Pradesh via gazette notification G.O.Ms. No. 13 dated 13.03.2024. The University Grants Commission (UGC) has included it in the list of UGC-listed Universities Vide Letter No. F.8-22/2024 (CPP-I/PU)-148904, dated 03.04.2025.

Annamacharya University, Rajampet, relentlessly aims to achieve academic excellence by implementing new initiatives in teaching-learning and evaluation processes. Based on the directions of the University Grants Commission (UGC), New Delhi, All India Council for Technical Education (AICTE), New Delhi, Department of Higher Education, Government of Andhra Pradesh, and Andhra Pradesh State Council of Higher Education (APSCHE), the university has adopted the AICTE and APSCHE model curriculum with minor modifications to match the needs, expectations, and skill sets of students in the state, in both the undergraduate and postgraduate programs offered from the academic year 2024-25.

Annamacharya University is promoting enhanced learning abilities through the integration of various skills into the curriculum, including (a) Critical Thinking, (b) Problem Solving, (c) Analytical Reasoning, (d) Scientific Reasoning, (e) Reflective Thinking, and (f) Design Thinking etc.,

Objectives:

The objectives of offering the B. Tech program are:

1. To empower students to focus on conceptual and empirical engineering knowledge.
2. To encourage a multidisciplinary perspective.
3. To encourage depth and breadth in understanding complex issues.
4. To provide broad interdisciplinary training with a well-sequenced curriculum over a sufficient length of time, giving students adequate preparation in their chosen field, either for higher studies or professional career.

Academic Council:

The academic council in a private university plays a pivotal role in maintaining and enhancing the academic standards and quality of education. The academic council coordinates and exercises general supervision over the academic policies of the university.

The Department Board of Studies (BoS):

Each department within the School of Engineering will have a Board of Studies common to the UG, PG, and Doctoral programs offered by the department. The Dean/Head of the department will serve as the Chairman of the Department Board of Studies. The Board of Studies has been constituted as per the guidelines of the university statutes. The rules, regulations, curriculum, syllabus, and other academic matters shall be approved by the Board of Studies before being placed in the Academic Council and subsequently the Board of Management.

Office of the Dean, Academics:

The office of the Dean, Academics, is responsible for the implementation of the decisions taken on academic matters by the Academic Council. The office:

- Receives, processes, and maintains all records relating to the programs, including curricula, courses offered, academic calendar, registration, assessments, and grades.
- Disseminates information pertaining to all academic matters, issues necessary memoranda/orders, and acts as a channel of communication between the students, instructors, and departments.
- Provides information about various academic programs, rules, and regulations to students.

2. REGULATIONS COMMENCEMENT

- The regulations are quite comprehensive and include definitions of key terms, semester system, credit system, grading system, and other relevant details.
- The regulations detailed herein shall apply to all the regular under-graduate programmes offered by the University.
- The regulations shall be applicable and come into force to the student batches admitted from the academic year 2024-25 and Lateral Entry students admitted from the academic year 2025-26.
- The University may revise, amend or change the regulations, scheme of examinations and syllabi, from time to time, if found necessary and on approval from the Academic Council

of the University, keeping the recommendations of the Board of Studies (BoS) in view.

- Any or all such amendments shall be effective from such date and to such batches of students including those already undergoing the programme, as may be approved through Academic Council of the University.
- These regulations shall be called AU24 Regulations.

3. ELIGIBILITY FOR ADMISSION

3.1 Admission into Engineering Under Graduation Programmes (Regular)

The eligibility criteria for admission into engineering undergraduate programmes offered at Annamacharya University shall be as prescribed by Statutes and Ordinances of the University and Higher Education Department, the Government of Andhra Pradesh. The criteria are given below:

- The candidate shall be an Indian National / NRI.
- The candidate should have completed 16 years of age as on 31st December of the academic year for which the admissions are being conducted.
- The candidate should have passed the qualifying examination (10+2) or equivalent as on the date of admission recognized by Board of Intermediate Education, Andhra Pradesh.
- Seats in each programme in the University are classified into two categories i.e., **Brownfield** and **Greenfield**. Further under brownfield category seats are filled through two categories, i.e., **Category – A** and **Category – B** as per the GOs of Andhra Pradesh.

BROWNFIELD CATEGORY:

The existing institution is converted into a brownfield university. The admission of students into the existing approved intake will be regulated by the admission rules and seat-sharing policies applicable to the University, as defined under Section 2(4-A) of the Andhra Pradesh Private Universities (Establishment and Regulation) Act, 2016. This means that 70% of the seats in the existing courses at the university will be filled through the convener of EAPCET. In this category, the seats are filled through Convener quota / Category – A and Management Quota / Category – B.

Category – A Seats (70% of seats)

These seats shall be filled through counselling as per the rank secured by a candidate in the Common Entrance Test (EAPCET) conducted by the Government of Andhra Pradesh and as per other admission criteria laid down in the GOs.

Category – B Seats (30% of seats):

These seats shall be filled by the University through AUET and the GOs issued by the Government of Andhra Pradesh from time to time. Annamacharya University Entrance Test (AUET) is conducted across India for those seeking admission to Engineering programmes offered by Annamacharya University. The eligibility criteria for appearing for AUET, the format, and other details will be specified in the application form and will be determined by the Office of the Director, Admission, Annamacharya University for the respective year of admissions.

GREENFIELD CATEGORY:

Furthermore, the admission rules for the brownfield university regarding any additional intake, new courses, or additional courses approved after conversion shall follow the regulations applicable to a greenfield university.

The university shall reserve 35% of seats in engineering, science, and other programs for the Government Quota and admit students in accordance with the rules prescribed for any additional intake in existing programs, as per the Andhra Pradesh Private Universities (Establishment and Regulation) Act, 2016.

Category – A Seats (35% of seats)

These seats shall be filled through counselling as per the rank secured by a candidate in the Common Entrance Test (EAPCET) conducted by the Government of Andhra Pradesh and as per other admission criteria laid down in the GOs.

Category – B Seats (65% of seats):

These seats shall be filled by the University through AUET and the GOs issued by the Government of Andhra Pradesh from time to time. Annamacharya University Entrance Test (AUET) is conducted across India for those seeking admission to Engineering programmes offered by Annamacharya University. The eligibility criteria for appearing for AUET, the format, and other details will be specified in the application form and will be determined by the Office of the Director, Admission, Annamacharya University for the respective year of admissions.

3.2 Admission into Second Year (Lateral Entry Scheme)

A candidate shall be admitted into the third semester (II year I semester) based on the rank secured by the candidate in the Engineering Common Entrance Test (ECET) by the Government of Andhra Pradesh and AUET examination conducted by university as per other admission criteria laid down in the Ordinances and Principal Act.

3.3 Authority for Admission:

Any matter related to admission to the B.Tech., programme, the decision of the Office of the Director, Admissions is final.

3.4 Revoking / Cancellation of Admission:

All students admitted provisionally to any program must submit copies of their original mark sheets, provisional certificates, and any other documents required by the Director of Admissions by the last date specified in the Academic Calendar of Annamacharya University.

The Registrar, based on the recommendation of the Director of Admissions, may cancel the admission of any student who fails to submit the prescribed documents by the specified date or does not meet other stipulated requirements. Additionally, the Registrar may cancel the admission later if it is discovered that the student provided false information, suppressed information, misrepresented facts, or forged documents while seeking admission or thereafter, and report the matter to the Vice Chancellor.

4. MEDIUM OF INSTRUCTION

The medium of instruction shall be **English** for all the courses including their content delivery and examinations, seminars, presentations, and project evaluation as prescribed in the programme curriculum.

5. B.TECH. PROGRAMME STRUCTURE

The structure of the B.Tech. Programmes on offer at Annamacharya University is based on the **Choice Based Credit System (CBCS)** as defined by the UGC and the curriculum / course structure as suggested by the AICTE, UGC and APSCHE in its Model Curriculum.

Semester Scheme

- The B. Tech Programmes offered at Annamacharya University follow **semester scheme** pattern.
- The duration of a B. Tech. Programme shall be of **4 academic** years for 4-year B. Tech programmes **and 3 academic years** for 3-year B. Tech programmes in lateral entry scheme.
- Each academic year shall have **2 semesters** i.e., odd and even semesters and shall be counted as I Year I Semester, I Year II Semester, and II Year I Semester and so on up to IV Year II semester.
- Each semester shall consist of 16 weeks of instructions.

- Each semester is structured to provide credits totalling to **160 credits** for the entire B.Tech. Programme.
- Each semester shall have **Continuous Internal Evaluation (CIE)** and **Semester End Examination (SEE)** for both Theory and Lab courses.
- Each student is required to secure a total of **160 credits with a CGPA ≥ 5** for the completion of the UG programme and the award of the B.Tech. Degree.
- A student after securing admission into a 4-year B. Tech Programme at Annamacharya University shall pursue and acquire the B.Tech. degree in a **minimum period of four academic years i.e., 8 semesters** and a **maximum period of eight academic years i.e., 16 semesters** starting from the date of commencement of I year I semester, failing which the student shall forfeit the seat in B.Tech. Programme.
- A student after securing admission into a 3-year B. Tech Programme (Lateral Entry) at Annamacharya University shall pursue and acquire the B.Tech. Degree in a **minimum period of three academic years i.e., 6 semesters** and a **maximum period of six academic years i.e., 12 semesters** starting from the date of commencement of II year I semester, failing which the student shall forfeit the seat in B.Tech. programme.
- University shall take measures to implement Virtual Labs (<https://www.vlab.co.in>) which provide remote access to labs in various disciplines of Engineering and will help student in learning basic and advanced concepts through remote experimentation. Student shall be made to work on virtual lab experiments during the regular labs.

6. PROGRAMMES OFFERED BY THE UNIVERSITY

The following B. Tech. programmes are offered by the University from the 2024-25.

SNo	Name of the Program	Programme Code
1	Civil Engineering	CIV
2	Electrical and Electronics Engineering	EEE
3	Mechanical Engineering	MEC
4	Electronics and Communication Engineering	ECE
5	Computer Science and Engineering	CSE
6	Artificial Intelligence and Data Science	AID
7	Artificial Intelligence and Machine Learning	AIM
8	Computer Science and Engineering (Artificial Intelligence)	CSI
9	Computer Science and Engineering (Data Science)	CSD
10	CSE (Artificial Intelligence and Machine Learning)	CSM
11	CSE (Internet of Things and Cyber Security including Block Chain Technology)	CIC

7. COURSES AND CREDIT STRUCTURE

Credit: A credit is a unit by which the course work is measured. It determines the number of hours of instructions required per week. One credit is equivalent to one hour of teaching (Lecture/Tutorial) or two hours of practical work/field work/project per week.

Academic Year: Two consecutive (one odd + one even) semesters constitute one academic year.

Choice Based Credit System (CBCS): CBCS provides choice for students to select from the prescribed courses.

Each course is assigned certain number of credits based on following criterion.

Type of Class	Semester	
	Periods per Week	Credits
Theory (Lecture/Tutorial)	01	01
	02	02
Practical	02	01
	03	1.5
	04	02
Project Work / Internship	-	16

Every course of the B. Tech. programme shall be offered by a specific section / department. The unique codes of the section / department offering the courses are given in the Table.

Course offering Department	Code
Basic Science Courses	Mathematics – MAT Physics – PHY Chemistry -CHE English – ENG
Humanities and Social Science Courses including Management Courses	HSMC
Civil Engineering	CIV
Electrical and Electronics Engineering	EEE
Mechanical Engineering	MEC
Electronics & Communication Engineering	ECE
Computer Science & Engineering	CSE
Artificial Intelligence and Data Science	AID
Artificial Intelligence and Machine Learning	AIM
Computer Science and Engineering (Artificial Intelligence)	CAI
Computer Science and Engineering (Data Science)	CSD
CSE (Artificial Intelligence and Machine Learning)	CSM
CSE (Internet of Things and Cyber Security including Block Chain Technology)	CIC

Every B. Tech. Programme of study shall be designed to have theory and laboratory courses. In addition, a student shall carry out internship, project, socially relevant project, and other mandatory courses as prescribed in the curriculum of the Programmes.

7.1 Types of Courses:

TYPE OF COURSES	COURSE CATEGORY	CODE	Credit Distribution	Percentage of Total Credits (%)	AICTE Recommendation (%)
Foundation	Engineering Sciences	ES	23.5	14	10-18
	Basic Sciences	BS	20	13	12-16
	Humanities & Social Sciences and Management	HSM	13	8	8-9
Core	Professional Core	PC	54.5	34	30-36
Project	Project (12)	PROJ	16	10	8-11
	Internship (4)				
Elective courses	Professional Elective	PE	33	21	19-23
	Open Elective (Including two MOOCs)	OE			
	Domain Specific Skill Oriented Courses	SEC			
Mandatory Courses	Mandatory	MC	-	-	-
Total Credits			160	100	100

7.1.1 Foundation Courses

Engineering Science courses, Basic Science Courses and Humanities courses are termed as Foundation Courses and are mostly offered at I and II Year.

7.1.2 Professional Core Courses

Professional Core Course is to be completed by all students of respective programme before they can move on to the next semester.

7.1.3 Professional Core Electives

University Grants Commission has come up with the Choice Based Credit System (CBCS) in which the students have a choice to choose from the prescribed courses, which are referred as Professional elective and Open Elective courses. All the Professional and Open elective courses shall be offered for 3 credits.

Students have to register for a total of 5 professional core electives courses (PE-1 to PE-5) from the list of track-wise professional elective course as prescribed in the course structure of the programme. The following points are considered for a Professional Elective Course.

- Maximum strength of a class /section for each semester shall be 72.
- A course may be offered to the students, only if a minimum of 24 students (1/3 of the section strength) opts for it.
- The selection of course based on the choice for students shall be on 'first come first serve' through online and offline registration.
- The Head of the department or concerned shall decide, whether or not to offer such course keeping in view the resources available in the department offering the course.

7.1.4 Open Electives

Choice Based Credit System (CBCS) is promoted in such a way that different open elective courses should be offered by every department in engineering to other departments. This interdisciplinary of learning open elective courses by other department students will have learning awareness and job-oriented benefits. Students will have the opportunity to choose any open elective course from different departments and apply their knowledge to acquire jobs in that field of course. Learning and employment benefits are not only through their own course subjects but also through open elective courses.

Every student shall earn prescribed credits by choosing one of the open elective courses from the list of Open Electives given in the Curriculum. Two Open electives (OE1 & OE2) are to be chosen

from the repository of **inter-disciplinary MOOCs** courses offered by NPTEL or any other recognized Institutions/Organization. Students shall consult their mentors before opting for an open elective course (MOOCs).

Further students from a particular program/branch can opt for one Open Elective (OE3) offered by their concerned department. However, one Open Electives (OE4) is inter-disciplinary and shall be offered by other branches.

The following guidelines are pertaining to Open Elective Courses.

- Maximum strength of a class /section for each semester shall be 72.
- A course may be offered to the students, only if a minimum of 24 students (1/3 of the section strength) opts for it. The minimum number of students is required to register the course to offer opted course in the department.
- The selection of course based on the choice for students shall be on 'first come first serve' through online and offline registration.
- The Head of the department or concerned shall decide, whether or not to offer such course keeping in view the resources available in the department offering the course.

7.1.5 Massive Open Online Courses as Open Elective

- MOOCs (Massive Open Online Courses) are introduced to meet with the global requirements and to inculcate the habit of self-learning and in compliance with the UGC guidelines.
- A student shall be permitted to pursue up to a maximum of two electives courses under MOOCs during programme. Each of courses must be of minimum 12 weeks in duration.
- Concerned departments **shall declare the list of inter-disciplinary** courses that a student can pursue through MOOCs at the beginning of the corresponding semester.
- Students interested in pursuing MOOCs shall register for the course and submit this information at their department office at the start of the corresponding semester.
- Course content for the selected MOOCs shall be drawn from the respective MOOCs offering Portal.
- Course progress shall be monitored by the Mentors designated by the Dean / HoD.
- Grade obtained through the evaluation of the MOOC shall be considered for the CGPA calculation.
- Three credits shall be awarded to the student upon successful completion of MOOC.

- In case a student fails to complete the MOOCs he/she shall re-register for the same with the same provider, already offered that course. In case that provider discontinues to offer the course, University shall conduct an offline examination in the same format, which student already appeared in online examination, as per the MOOCs syllabus.

7.1.6 Skill Oriented Courses / Skill Advanced courses

- There shall be 4 skill-oriented courses offered during 3rd to 7th semester. Among the 4 skill-oriented courses, 3 courses shall focus on the basic to advanced skills related to the domain courses and remaining 1 shall be a soft skills course.
- Skill oriented / skill advanced courses carry 2 credits
- For skill oriented/skill advanced course, 1 theory and 2 practical hours may be allotted as per the decision of concerned BOS.
- Out of the 4 skill courses, 2 skill courses shall be skill-oriented courses from the same domain and shall be completed in 2nd year. Of the remaining 2 skills courses, 1 shall necessarily be a soft skill course and the remaining, 1 shall be skill advanced course either from the same domain or job-oriented skill course, which can be of inter-disciplinary nature.
- A pool of interdisciplinary job-oriented skill courses shall be designed by a common Board of studies by the participating departments and the syllabus along with the pre-requisites shall be prepared for each of the laboratory infrastructure requirements.
- The student shall be given an option to choose either the skill courses being offered by the university or to choose a certificate course being offered by Industries/Professional Bodies/ APSSDC or any other accredited bodies as approved by the concerned BOS.
- If a student chooses to take a certificate course offered by Industries / Professional Bodies / APSSDC or any other accredited bodies, in lieu of the skill advanced course offered by the department, the credits shall be awarded to the student upon producing the course completion certificate from Industries/Professional Bodies/ APSSDC as approved by the concerned BOS.
- If a student prefers to take a certificate course offered by external agency, the department shall mark attendance of the student for the remaining courses in that semester excluding the skill oriented course in all the calculations of mandatory attendance requirements upon producing a valid certificate as approved by the concerned BOS, the student is

deemed to have fulfilled the attendance requirements of the course and acquire the credits assigned to the course.

- A committee shall be formed at the level of the University to evaluate the grades/marks given for a course by external agencies and convert to the equivalent marks/grades. The recommended conversions and appropriate grades/marks are to be approved by the Academic Council of the University.

7.1.7 Mandatory Courses

Courses such as Environmental Sciences, Gender sensitization, and Technical Paper Writing & IPR are offered as non-credit mandatory courses for all the undergraduate students.

- A student shall pursue mandatory courses as specified in the course structure of the B.Tech. Programme.
- These courses are among the compulsory courses and do not carry any credits.
- A student has to secure 40 marks out of 100 in the Internal Examination, shall be necessary requirement for the student to qualify for the **award of Degree**.
- Result of mandatory courses shall be declared with “**Pass**” or “**Fail**” performance in the Comprehensive Marks Memo.
- No marks or letter grade shall be allotted.
- Attendance in the mandatory course shall be considered while calculating aggregate attendance.

7.1.8 Universal Human Values (UHV) Courses

- Universal Human Values-I shall be a mandatory student Induction Programme with no credits for freshers, with a two / three - week duration before the commencement of first semester. Physical activity, Creative Arts, Universal Human Values, Literary, Proficiency Modules, Lectures by Eminent People, Visits to local Areas, Familiarization to Dept./Branch & Innovations etc., are included as per the guidelines issued by UGC and AICTE.
- The Universal Human Values-II course carries 3 credits. The assessment is to provide a fair state of development of the student, so participation in classroom discussions, self-assessment, peer assessment etc. will be used in evaluation.
- A student must secure 40% marks out of 100 in the CIE and SEE together to qualify for the award of the degree. The distribution shall be 50 marks for continuous internal assessment and 50 marks for semester end examination.

- Internal evaluation shall be conducted for the course during semester and shall be evaluated for 50 marks and distributions of marks as follows:
 - Assessment by faculty mentor: 10 marks
 - Self-assessment: 10 marks
 - Assessment by peers: 10 marks
 - Socially relevant project/Group Activities/Assignments: 20 marks

7.1.9 Language Elective

- The Language Elective course carries 1 credit. Students must register for either German, French, Spanish, or Arabic based on their choice and complete the online certificate course in the semester it is offered. One hour is allocated in the regular timetable, and the teacher will guide the students, if they encounter any difficulties during the course. Evaluation will include participation in classroom discussions, self-assessment only.
- The course will be graded on a Pass/Fail basis. A pass grade is awarded upon verification of the completion certificate.
- Failure to complete the course within the stipulated time frame will result in no credit being awarded, and the elective will need to be retaken.
- A committee shall be formed at the level of the University to evaluate the grades/marks given for a course by external agencies and convert to the equivalent marks/grades. The recommended conversions and appropriate grades/marks are to be approved by the Academic Council of the University.

8. Evaluation Process

The performance of a student in each semester shall be evaluated course-wise with a maximum of 100 marks for both Theory and Lab Course.

- For a Theory course, the distribution shall be 40 marks for Internal Evaluation and 60 marks for End-Evaluation. The distribution is detailed in 8.1.1.
- For a Lab course, the distribution shall be 40 marks for Internal Evaluation and 60 marks End- Evaluations. The distribution is detailed in 8.1.3
- Project Work shall be evaluated for 200 marks. Mandatory courses with no credits shall be evaluated for 100 marks.

8.1 Internal Evaluation

For a Theory Course, 40 marks are allotted for Internal Evaluation. Two Internal examinations (Theory Internal Examinations) shall be conducted for a Theory Course during a semester, and they shall be evaluated for 40 marks of which 30 marks are given for Continuous Internal Examination and 10 marks for assignment. For Lab Course, there shall be a continuous internal evaluation during the semester for 40 marks.

8.1.1 Theory Internal Evaluation

Theory Continuous internal examination shall have Part A & Part B. In Part A, which is compulsory, five short answer questions each of which carries 1 mark. There shall be no sub-questions or bits. The examination shall be conducted for 2 hours.

Part B shall contain three either or type questions (Total six questions from 1 to 6). Each question shall carry 10 marks. 30 marks allotted for Part B shall finally be scaled down to 25 marks. The questions shall be set/ moderated such that the student can comfortably answer each question within the stipulated time.

Question paper pattern for Continuous Internal Examination (30 Marks) shall be as follows:

PART A: Five short answer questions - $5 \times 1 = 5$ Marks

PART B: 30 Marks (will be scaled to 25 marks)

- (i) There shall be three questions with internal Choice i.e., 'either' or 'choice.'
- (ii) The student shall answer three questions.

First Theory Continuous Internal examination shall be conducted as per the syllabus of I & II units. The second Continuous internal examination shall be conducted as per the syllabus of III, IV and V units. 80% weightage for the best performance and 20% the other shall be considered. Final value shall be rounded up.

For Example:

Marks obtained in I Internal examination: 19

Marks obtained in II Internal examination: 10

Final Internal Marks: $(19 \times 0.8) + (10 \times 0.2) = 17.2$

If the student is absent for any one Internal examination, the final internal marks shall be arrived at by considering 80% weightage to the marks secured by the student in the appeared examination and zero to the other.

For Example:

Marks obtained in first Internal: 0 (Absent); Marks obtained in second Internal: 18

Final Internal Marks: $(18 \times 0.8) + (0 \times 0.2) = 14.4$

For course namely, Engineering Graphics / Engineering Drawing, the distribution of internal evaluation and external evaluation marks shall be 40 and 60, respectively.

Of the 40 internal evaluation marks, day-to-day performance of the student shall be evaluated for 20 marks, and the examination shall carry 20 marks. Day-to-day work shall be evaluated by the concerned teacher based on the exercises, submissions, and assignments prepared in the class. Two examinations shall be conducted in a semester, each with a duration of 2 lecture hours. Each examination is for 10 marks, with a weightage of 80% for the better of the two and 20% for the other. The sum of day-to-day work and the examination marks will be the final day-to-day evaluation for 40 marks for the subject. The final evaluation shall be for 60 marks and is of 3 hours duration, conducted internally. The question paper shall consist of 5 questions, one from each unit, with internal choice. All questions carry 12 marks each.

8.1.2 Assignment (Theory)

The assignment shall contain essay-type numerical questions, out-of-the-box thinking questions, etc. The assignments are given by the concerned teacher for 10 marks from the first two units. The second assignment shall be given from the rest of the syllabus. The first assignment should be submitted before the first internal examination, and the second assignment should be submitted before the second internal examination. The number of questions is limited to 5, and teachers should frame the questions by considering all Course Outcomes. There shall be at least two assignments in a semester, and the average performance of the two assignments will be considered.

8.1.3 Lab Internal Evaluation

Out of the 40 marks allotted for Lab Internal Evaluation, day-to-day performance of the student in the laboratory shall be evaluated for 20 marks by the concerned laboratory teacher based on

experimental evaluation/record/viva. Two Lab Internal examinations shall be conducted for 20 marks by the concerned teacher. Performance of one best out of two tests to be considered. The day-to-day marks distribution is as follows:

- Observation : 5 Marks
- Record : 5 Marks
- Performing the experiment / Program / Activity : 10 Marks

8.1.4 Internal Evaluation of Mandatory Courses

Mandatory courses are offered with no credits. However, a student has to complete Mandatory Courses in order to be eligible for the award of the Degree. There shall be a Continuous Internal Examination for 100 marks. A student shall be declared to have passed the mandatory course only when he/she secures 40% or more in the internal examination. In case, the student fails, a supplementary examination shall be conducted.

8.1.5 Make-up Internal Examination

The student who has missed both the Theory Continuous Internal examinations will be permitted to appear for a Make-up Continuous Internal examination in the event of his/her producing satisfactory evidence of medical sickness. One Make-up internal test shall be conducted immediately after the II Continuous Internal examination in the same semester, covering the total syllabus of FIVE Units in the respective course.

This Make-up examination will be given a weightage of 80%. Make-up tests shall be conducted outside the working hours and there can be even two such examinations on a day.

Student absent for I Internal examination with valid reasons he/ she should produce a supporting document to the department within a week after completion of last internal examination. And the same student absent for same subject in II Internal examination, he/ she should produce a supporting document to the department immediately in order to giving the provision for makeup examination.

Make-up internal examinations are not for improvement of marks in Theory Internal examinations. There shall be no make-up internal examinations for a Lab course.

8.1.6 Evaluation of Skill oriented / Skill advanced / Soft Skills course

Course type: Laboratory

Distribution of marks: 40:60

Evaluation Type: Internal Evaluation

A student is evaluated for a maximum of 100 marks with respect to skill-oriented course / Skill advanced courses / Soft skill course. The distribution of marks shall be 40 for internal evaluation and 60 for external evaluation. For Internal Evaluation, day-to-day performance of the student in the laboratory shall be evaluated for 40 marks by the concerned skill-oriented course / Skill advanced courses / Soft skill course class teacher based on experimental evaluation / discussions / results / reports. External evaluation is done for 60 marks in a laboratory end semester examination conducted for 3 hours.

Note: Each skill-oriented course / Skill advanced courses / Soft skill course will have its own evaluation procedure and weightage. The respective department prepare and provide the evaluation format to the student in the beginning of the semester.

8.2 End Evaluation

8.2.1 Theory End Evaluation

As specified in 8.0, Theory End Evaluation is done for 60 marks. Semester End examination of theory subjects shall be conducted at the end of semester. There shall be Regular and Supplementary End Examinations. Theory Semester End Examination shall be conducted for 60 marks and is of 3 hours duration.

Theory Semester End Examination shall have Part A & Part B. In Part A, which is compulsory, five short answer questions each unit of which carries two marks shall be given. There shall be no sub-questions or bits or fill-up the blanks.

Part B shall contain five either or type questions (Total 10 questions with internal choice). 50 marks allotted for Part B and each question shall carry 10 marks. There will be one question from each unit. The examination shall be conducted for 3 hours.

Question paper pattern for Semester End Examination (60 Marks) shall be as follows:

PART A: 5 x 2 = 10 Marks

- (i) There shall be one question from each unit.
- (ii) Part A is compulsory.

PART B: 5 x 10 = 50 Marks

- (i) Five questions with internal choice will be given.
- (ii) There shall be one question from each unit with Internal Choice i.e., 'either' or 'choice.'
- (iii) Sub questions may also be given.

8.2.2 Lab End Evaluation

As specified in 8.0, Lab End Evaluation is done for 60 marks, in the form a Lab End Examination that shall be conducted for 3 hours in respective Laboratory. Each lab course will have its own evaluation procedure and weightage.

8.2.3 Supplementary Theory / Lab End Examinations

- Supplementary examination shall be conducted along with regular semester end examinations.
- During Semester End Examinations of even semester, supplementary examinations of odd semester shall be conducted and during semester end examinations of odd semester, supplementary examinations of even semester shall be conducted.
- The same schedule is applicable to Supplementary Lab End Examinations. Supplementary examination shall be conducted along with the next batch of students or separately.
- Advanced supplementary shall be conducted only for Final Year II semester Students in view of their higher education pursuits and placement opportunities.
- In case of seminars and comprehensive viva-voce examinations, supplementary seminar / comprehensive viva-voce will be conducted along with the next batch of students. If the next batch of students is not available, a separate supplementary examination will be conducted.

8.2.4 Challenge Evaluation, Revaluation and Recounting

Students may visit Examination Section Webpage for Norms and Procedures for Challenge Evaluation, Revaluation and Recounting of Answer Scripts. (Refer to Appendix II).

9.0 Internship and Project Evaluation

9.1 Summer Internship / Research Internship (Industry / Govt. / NGO / MSME / Online)

- A student shall carry out a mandatory Internship for 2 months for 2 credits in 2nd year 2nd semester during summer vacation and it is evaluated during 3rd year 1st semester. A student shall carry a mandatory Industrial / Research Internship for 2 months for 2 credits in 3rd year 2nd semester during summer vacation and it is evaluated during 4th year 1st semester.
- Two summer internships, each with a minimum of 6 weeks duration. Done at the end of 2nd and 3rd year, respectively are mandatory. The internship can be done by the students at local industries, Govt. Organizations, construction agencies, Industries, Hydel and

thermal power projects and also in software MNCs.

- Evaluation of the summer internships shall be through the departmental committee. A student will be required to submit a summer internship report to the concerned departments and appear for an oral presentation before the departmental committee. The report and the oral presentation shall carry 40% and 60% weightages respectively.
- In the final semester, the student should mandatorily undergo internships and in parallel he/she should work on a project with well-defined objectives. At the end of the semester the candidates shall submit an internship completion certificate and a project report. A student shall also be permitted to submit a project report on the work carried out during the internship. The project report shall be evaluated by an external examiner.
- The respective departments shall facilitate and monitor the student internship programs. Completion of internships is mandatory, if any student fails to complete internship, he/she will not be eligible for the award of degree. In such cases, the student shall repeat and complete the internship.
- There shall also be mandatory full internship in the final semester of the programme along with the project work.
- For other details, please refer to Appendix I.

9.2 Project Work

Project work consists of a presentation of **Abstract of the main project** in the beginning of 8th Semester. The student shall collect the information related to the project topic and prepare a report, showing his/her understanding of the topic and submit the same to the department before presentation. Project shall be evaluated for a total of 200 marks. The technical presentation/report shall be evaluated by a committee consisting of Head of the Department along with two senior faculty members of the Department. A student shall acquire 12 credits assigned, if her/his report is declared Satisfactory by the committee based on Rubrics set by the Department for evaluation.

Out of a total of 200 marks for the **Project work**, the internal evaluation shall be carried for 50 marks done by a committee consisting of Dean / HOD, Project Supervisor and senior faculty member of the department and the remaining 150 marks shall be awarded by a committee consisting of Dean / HOD, project Supervisor and an External Examiner nominated by the Vice Chancellor or Dean Academics. The internal evaluation shall be done on the basis of two seminars

conducted in a semester as per the academic calendar and stipulated rubrics. In case, if a student fails in Project work, a re-examination shall be conducted within a month. In case he/she fails in the re-examination also, he/she shall not be permitted to register for viva voce examination. Further such students shall re-appear as and when the supplementary examinations are conducted for 8th Semester.

10. Credit Transfer Policy

Adoption of MOOCs is mandatory, to enable Blended model of teaching-learning as also envisaged in the NEP 2020. As per University Grants Commission (Credit Framework for Online Learning Courses through SWAYAM) Regulation, 2016, the University shall allow up to a maximum of 20% of the total courses being offered in a particular programme i.e., maximum of 32 credits through MOOCs platform.

- i) The University shall offer credit mobility for MOOCs and give the equivalent credit weightage to the students for the credits earned through online learning courses.
- ii) Student registration for the MOOCs shall be only through the respective departments of the university, it is mandatory for the student to share necessary information with the department.
- iii) The credit transfer policy will be applicable to the Professional & Open Elective courses only.
- iv) The department concerned shall identify the courses permitted for credit transfer.
- v) The respective department shall notify at the beginning of semester the list of the online learning courses eligible for credit transfer.
- vi) The respective department shall designate a faculty member as a Mentor for each course to guide the students from registration till completion of the credit course.
- vii) The University shall ensure no overlap of MOOC exams with that of the University examination schedule. In case of delay in results, the University will re-issue the marks sheet for such students.
- viii) Students pursuing courses under MOOCs shall acquire the required credits only after successful completion of the course and submitting a certificate issued by the competent authority along with the percentage of marks and grades.

ix) The respective department shall submit the following to the examination section of the University:

- a) List of students who have passed MOOC courses in the current semester along with the certificate of completion.
- b) Undertaking form filled in by the students for credit transfer.
- x) The university shall resolve any issues that may arise in the implementation of this policy from time to time and shall review its credit transfer policy in the light of periodic changes brought by UGC, SWAYAM, NPTEL and state government.

Note: Students shall be permitted to register for MOOCs courses offered through online platforms approved by the University from time to time.

11. Academic Bank of Credits (ABC)

The University has implemented Academic Bank of Credits (ABC) to promote flexibility in curriculum as per NEP 2020 to

- i) Provide option of mobility for learners across the universities of their choice
- ii) Provide options to gain credits through MOOCs from approved digital platforms.
- iii) Facilitate award of certificate/diploma/degree in line with the accumulated credits in ABC
- iv) Execute Multiple Entry and Exit system with credit count, credit transfer and credit acceptance from students' account.

12. Curricular Framework for Honors Programme

- Students of a Department/ Discipline are eligible to opt for Honors Programme offered by the same Department/Discipline
- A student shall be permitted to register for Honors program at the beginning of 4th semester provided that the student must have acquired a minimum of 7.5 SGPA up to the end of 2nd semester without any backlogs. In case of the declaration of the 3rd semester results after the commencement of the 4th semester and if a student fails to score the required minimum of 7.5 SGPA, his/her registration for Honors Programme stands cancelled and he/she shall continue with the regular Programme.

- Students can select the additional and advanced courses from their respective branch in which they are pursuing the degree and get an honors degree in the same. e.g. If a Mechanical Engineering student completes the selected advanced courses from the same branch under this scheme, he/ she will be awarded B. Tech (honors) in Mechanical Engineering.
- In addition to fulfilling all the requisites of a Regular B. Tech Programme, a student shall earn 20 additional credits are required to be eligible for the award of B. Tech (Honors) degree. This is in addition to the credits essential for obtaining the Undergraduate Degree in Major Discipline (i.e. 160 credits).
- Of the 20 additional Credits to be acquired, 16 credits shall be earned by undergoing specified courses listed as pools, with four courses, each carrying 4 credits. The remaining 4 credits must be acquired through two MOOCs, which shall be domain specific each with 2 credits and with a minimum duration of 8/12 weeks as recommended by the Board of Studies.
- It is the responsibility of the student to acquire/complete prerequisites before taking the respective course. The courses offered in each pool shall be domain specific courses and advanced courses.
- The BoS concerned shall decide on the minimum enrolments for offering Honors program by the department. If minimum enrolments criteria are not met, then the students shall be permitted to register for the equivalent MOOC courses as approved by the concerned Head of the department in consultation with BoS.
- Each pool can have theory as well as laboratory courses. If a course comes with a lab component, that component must be cleared separately. The concerned BoS shall explore the possibility of introducing virtual labs for such courses with lab components. (Model pool list is enclosed at the end of the syllabus)
- MOOC courses must be for a minimum of 8 weeks in duration. Attendance will not be monitored for MOOC Courses. Students have to acquire a certificate from the agencies approved by the BOS with grading or marks or pass/fail in order to earn 4 credits. If the MOOC course is a pass/fail course without any grades, the grade to be assigned will be as decided by the Academies Council.

- The concerned BoS shall also consider courses listed under professional electives of the respective B. Tech Programmes for the requirement of B. Tech (Honors). However, a student shall be permitted to choose only those courses that he/she has not studied in any form during the Programme.
- If a student drops or is terminated from the Honors programme, the additional credits so far earned cannot be converted into free or core electives; they will remain extra. These additional courses will be mentioned in the transcript (but not in the degree certificate). In such cases, the student may choose between the actual grade or a "pass (P)" grade and also choose to omit the mention of the course as for the following: All the courses done under the dropped Minors will be shown in the transcript. None of the courses done under the dropped Minor will be shown in the transcript.
- In case student fails to meet the CGPA requirement for Degree with Honors at any point after registration, he/she will be dropped from the list of students eligible for Degree with honors and they will receive regular B. Tech degree only, however, such students will receive a separate grade sheet mentioning the additional courses completed by them.
- Honors must be completed simultaneously with a major degree Programme. A student cannot earn Honors after he/she has already earned bachelor's degree.

13. Curricular Framework for Minor Programme

- Students who are desirous of pursuing their special interest areas other than the chosen discipline of Engineering may opt for additional courses in minor specialization groups offered by any department other than their parent department. For example, if Mechanical Engineering student selects subjects from Civil Engineering under this scheme, he/she will get Major degree of Mechanical Engineering with minor degree of Civil Engineering.
b) Student can also opt for Industry relevant tracks of any branch to obtain the Minor Degree, for example, a B. Tech Mechanical student can opt for the industry relevant tracks like Data Mining track, IOT track, Machine Learning track etc.
- The BOS concerned shall identify as many tracks as possible in the areas of emerging technologies and industrial relevance/demand. For example, the minor tracks can be the fundamental courses in CSE, ECE, EEE, CE, ME etc., or industry tracks such as Artificial

Intelligence (AI), Machine Learning (ML), Data Science (DS), Robotics, Electric Vehicles, and VLSI etc.,

- The list of disciplines / branches eligible to opt for a particular industry relevant minor specialization shall be clearly mentioned by the respective BoS.
- There shall be no limit on the number of programs offered under Minor. The university can offer minor programs in emerging technologies based on expertise in the respective departments or can explore the possibility of collaborating with the relevant industries/agencies in offering the Programme.
- The concerned BoS shall decide on the minimum enrolments for offering Minor program by the department. If a minimum enrolments criterion is not met, then the students may be permitted to register for the equivalent MOOC courses as approved by the concerned Head of the department in consultation with BoS.
- A student shall be permitted to register for Minors Programme at the beginning of 4th semester subject to a maximum of two additional courses per semester, provided that the student must have acquired 7.5 SGPA up to the end of 2nd semester without any history of backlogs. It is expected that the 3rd semester results may be announced after the commencement of the 4th semester. If a student fails to acquire 7.5 SGPA up to 3rd semester or failed in any of the courses, his/her registration for Minors program shall stand cancelled. An SGPA of 7.5 has to be maintained in the subsequent semesters without any backlogs in order to keep the Minors registration active.
- A student shall earn an additional 20 credits in the specified area to be eligible for the award of B. Tech degree with Minor. This is in addition to the credits essential for obtaining the Undergraduate Degree in Major Discipline (i.e. 160 credits).
- Out of the 20 credits, 16 credits shall be earned by undergoing specified course listed by the concerned BoS along with prerequisites. It is the responsibility of the student to acquire/complete prerequisites before taking the respective course. If a course comes with a lab component, that component has to be cleared separately. A student shall be permitted to choose only those courses that he/she has not studied in any form during the Programme.
- In addition to the 16 credits, students must pursue at least 2 courses through MOOCs. The courses must be of minimum 8 weeks in duration. Attendance will not be monitored for

MOOC courses. A student has to acquire a certificate from the agencies approved by the BOS with grading or marks or pass/fail in order to earn 4 credits. If the MOOC course is a pass/fail course without any grades, the grade to be assigned as decided by the Academic Council of the university.

- Students can opt for the industry relevant minor specialization as approved by the concerned departmental BoS. Students can opt for the courses from Skill Development Corporation (APSSDC) or can opt the courses from an external agency recommended and approved by the BOS concerned and should produce course completion certificate. The Board of studies of the concerned discipline of Engineering shall review such courses being offered by eligible external agencies and prepare a fresh list every year incorporating the latest skills based on industrial demand.
- A committee should be formed at the level of University / Department to evaluate the grades/marks given by external agencies to a student which are approved by concerned BoS. Upon completion of courses the departmental committees should convert the obtained grades/marks to the maximum marks assigned to that course. The controller of examinations can take a decision on such conversions and may give appropriate grades.
- If any student drops (or terminated) from the Minor Programme, they cannot convert the earned credits into free or core electives, they will remain extra. These additional courses will find mentioned in the transcript (but not in the degree certificate). In such cases, the student may choose between the actual grade or a "pass (P)" grade and also choose to omit the mention of the course as for the following:
 - All the courses done under the dropped Minors will be shown in the transcript.
 - None of the courses done under the dropped Miner will be shown in the transcript.
- In case a student fails to meet the CGPA requirement for B. Tech degree with Minor at any point after registration, he/ she will be dropped from the list of students eligible for degree with Minors and they will receive B. Tech degree only. However, such students will receive a separate grade sheet mentioning the additional courses completed by them.
- Minor must be completed simultaneously with a major degree Programme. A student cannot earn the Minor after he/she has already earned bachelor's degree.

14. Attendance Requirements and Detention Policy

- A student shall maintain a minimum required attendance of 75% in AGGREGATE of all the subjects in a semester (*Amended: Amend No:1*).
- Shortage of attendance up to 10% i.e., attendance between 65% to 75% in aggregate, may be condoned by the University Academic Committee based on the rules prescribed by the Academic Council of the University from time to time.
- A stipulated fee shall be payable towards condonation of shortage of attendance.
- Shortage of attendance below 65 % shall in no case be condoned. A stipulated fee shall be payable towards condonation of shortage of attendance to the University as per following slab system.

1stSlab: Less than 75 % attendance but equal to or greater than 70 % a normal condonation fee can be collected from the student.

2ndSlab: Less than 70 % but equal to or greater than 65 %, double the condonation fee can be collected from the student.

- Students whose shortage of attendance is not condoned OR who have not paid the stipulated fee OR who have not cleared any other due to the University in any semester are not eligible to write the Semester End Examination (SEE).
- Students, who do not meet the minimum required attendance of 65% in a semester, shall be detained in that semester and their registration for that semester shall stand cancelled. They shall not be promoted to the next semester.
- Students detained in a semester shall seek re-admission into that semester as and when offered.
- Academic regulations applicable to the semester in which re-admission is sought shall be applicable to the re-admitted student.
- In case, there are any professional electives and /or open electives, the same may also be re-registered, if offered. However, if those electives are not offered in the later semesters, then alternate electives may be chosen from the same set of elective courses offered under that category.

Any student against whom any disciplinary action is pending shall not be permitted to attend Semester End examination (SEE) in that semester.

15. Minimum Academic Requirements and Award of the Degree

The following academic requirements must be satisfied in addition to the attendance requirements mentioned in section 14.

- i) A student has to secure not less than 35% of marks in the end examination and a minimum of 40% of marks in the sum total of the mid semester and end examination marks taken together for the theory, practical, design, drawing subject or project etc. In case of a mandatory course, he/she should secure 40% of the total marks.
- ii) A student shall be promoted from first year to second year if he/she fulfills the minimum attendance requirement as per university norms.
- iii) A student will be promoted from II to III year if he/she fulfills the academic requirement of securing 40% of the credits (any decimal fraction should be rounded off to lower digit) up to in the subjects that have been studied up to III semester.
- iv) A student shall be promoted from III year to IV year if he/she fulfills the academic requirements of securing 40% of the credits (any decimal fraction should be rounded off to lower digit) in the subjects that have been studied up to V semester. And in case a student is detained for want of credits for a particular academic year by ii) & iii) above, the student may make up the credits through supplementary examinations and only after securing the required credits he/she shall be permitted to join in the V semester or VII semester respectively as the case may be.
- v) When a student is detained due to lack of credits/shortage of attendance he/she may be re-admitted when the semester is offered after fulfillment of academic regulations. In such a case, he/she shall be in the present academic regulations into which he/she is readmitted.
- vi) Students who fail to earn 160 credits as indicated in the course structure within eight academic years from the year of their admission shall forfeit their seat on the B.Tech. course and their admission shall be cancelled.

16. Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

As a measure of the student's performance, a 10-point Absolute Grading System using the following Letter Grades and corresponding percentage of marks shall be followed:

After each course is evaluated for 100 marks, the marks obtained in each course will be converted to a corresponding letter grade as given below, depending on the range in which the marks obtained by the student fall.

Structure of Grading of Academic Performance

Range in which the marks in the subject fall	Grade	Grade points
		Assigned
90 & above	Superior	10
80 - 89	A (Excellent)	9
70 - 79	B (Very Good)	8
60 - 69	C (Good)	7
50 - 59	D (Average)	6
40 - 49	E (Pass)	5
< 40	F (Fail)	0
Absent	Ab (Absent)	0

- i) A student obtaining Grade 'F' or Grade 'Ab' in a subject shall be considered failed and will be required to reappear for that subject when it is offered the next supplementary examination.
- ii) For non-credit audit courses, "Satisfactory" or "Unsatisfactory" shall be indicated instead of the letter grade and this will not be counted for the computation of SGPA/CGPA/Percentage.

Computation of Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

The Semester Grade Point Average (SGPA) is the ratio of sum of the product of the number of credits with the grade point scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e.,

$$SGPA = \frac{\sum (C_i * G_i)}{\sum C_i}$$

Where C_i is the number of credits of the i^{th} subject and G_i is the grade point scored by the student in the i^{th} course

The Cumulative Grade Point Average (CGPA) will be computed in the same manner considering all the courses undergone by a student over all the semesters of a program, i.e.,

$$CGPA = \frac{\sum(C_i * S_i)}{\sum C_i}$$

Where S_i is the SGPA of the i^{th} semester and C_i is the total number of credits up to that semester.

Both SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts. While computing the SGPA the subjects in which the student is awarded Zero grade points will also be included.

Grade Point: It is a numerical weight allotted to each letter grade on a 10-point scale. Letter

Grade: It is an index of the performance of students in a said course. Grades are denoted by the letters S, A, B, C, D and F.

Award of Class:

After a student has satisfied the requirements prescribed for the completion of the program and is eligible for the award of B. Tech. Degree, he/she shall be placed in one of the following four classes:

Class Awarded	CGPA Secured
First Class with Distinction	≥ 7.5
First Class	$\geq 6.5 < 7.5$
Second Class	$\geq 5.5 < 6.5$
Pass Class	$\geq 5.0 < 5.5$

16.1 Conversion of SGPA into percentage

In case of a specific query by students/employers regarding Semester Grade Point Average (SGPA)/ Cumulative Grade Point Average (CGPA) into percentage, the following formulae will be adopted for notional conversion of CGPA into percentage.

CGPA to Percentage conversion Formula – (CGPA – 0.5) x 10.

17. Transcripts

After successful completion of the entire programme of study, a transcript containing performance of all academic years will be issued as a final record. Duplicate transcripts will also be issued, if required, after payment of requisite fee. Partial transcript will also be issued up to any point of study to a student on request.

18. Transitory Regulations

Discontinued, detained, or failed candidates are eligible for re-admission as and when the semester is offered after fulfilment of academic regulations. Candidates who have been detained for want of attendance or not fulfilled academic requirements or who have failed after having undergone the course in earlier regulations or have discontinued and wish to continue the course are eligible for admission into the unfinished semester from the date of commencement of class work with the same or equivalent subjects as and when subjects are offered, subject to Section 2 and they will follow the academic regulations into which they are re-admitted.

Candidates who are permitted to avail gap year shall be eligible for re-joining into the succeeding year of their B. Tech from the date of commencement of class work, subject to Section 2 and they will follow the academic regulations into which they are re-admitted.

19. Re-admission of Students

A student who has satisfied the minimum attendance requirement in any semester may repeat that semester, after obtaining written permission from the Registrar and cancelling the previous record of attendance and academic performance (viz; internal evaluation and external evaluation marks) of the semester or year. This facility may be availed by any student at the maximum twice for a 4-year B. Tech, and only once by Lateral Entry student during the entire course of study.

20. Minimum Instruction Days for a Semester

The minimum instruction days for each semester shall be 16 weeks.

21. Student transfers

Student transfers shall be as per the statutes and ordinances of the Annamacharya University and guidelines issued by the Government of Andhra Pradesh from time to time.

22. Announcement of results

- Results review committee comprising of Vice Chancellor, Registrar, Dean Academics, Chairman of various boards of studies, Controller of Examinations and Deputy Controller of Examinations will monitor the results and gives the permission for announcement of results.
- After review meeting results are loaded into university website from which students can access their results by entering Hall Ticket number. And also results in form of hard copy are available with respective Deans / Heads of the departments.

23. General Instructions:

- The academic regulations should be read as a whole for purpose of any interpretation.
- Malpractices rules-nature and punishments are appended.
- Where the words "he", "him", "his", occur in the regulations, they also include "she", "her", "hers", respectively.
- In the case of any doubt or ambiguity in the interpretation of the above rules, the decision of the Vice Chancellor / Registrar / Governing body is final.
- Any legal issues are to be resolved in Rajampet Jurisdiction.
- The University may change or amend the academic regulations or syllabi at any time and the changes or amendments shall be made applicable to all the students on rolls with effect from the dates notified by the University.

Appendix-I: Internship Guidelines

The Dean / Head of the Department will arrange internship for students in industries / organization after fifth semester as per AICTE/ University guidelines. The university may also device online system for arranging & managing internships. The general procedure for arranging internship is given below:

Step 1: Request Letter/ Email from the office of HOD of the department should go to industry to allot various slots of 4-6 weeks during summer vacation as internship periods for the students. Students request letter/profile/ interest areas may be submitted to industries for their willingness for providing the training.

Step 2: Industry will confirm the training slots, and the number of seats allocated for internships via Confirmation Letter/ Email. In case the students arrange the training themselves the confirmation letter will be submitted by the students in the office of Training & Placement through concerned department. Based on the number of slots agreed to by the industry.

Step 3: Students on joining Training at the concerned Industry / Organization, submit the Joining Report/ Letters / Email.

Step 4: Students undergo industrial training at the concerned Industry / Organization. In-between Faculty Member(s) evaluate(s) the performance of students once/twice by visiting the Industry/Organization and Evaluation Report of the students is submitted in department office/TPO with the consent of Industry persons/ Trainers.

Step 5: Students will submit training report after completion of internship.

Step 6: Training Certificate to be obtained from industry.

Step 7: List of students who have completed their internship successfully will be issued by concerned Department.

For more details refer:

<https://www.aicte-india.org/sites/default/files/AICTE%20Internship%20Policy.pdf>

Appendix II: Norms and Procedures for Challenge Evaluation/Revaluation/Recounting

Revaluation / Recounting:

- The students who wish to apply for Revaluation/Recounting of his/her answer-books(s) must submit his/her application on the prescribed form together with the requisite fee to the Controller of Examinations before expiry of 15 days excluding the date of the declaration of his/her examination result. Application not received in the prescribed form or by the due date or without the requisite fee shall be rejected.
- After Recounting / Revaluation, records are updated with changes if any and the student will be issued a revised memorandum of marks. If there are no changes, the student shall be intimated the same through a notice.
- No Revaluation / Recounting for Laboratory Examination.
- The students are informed to be more careful in furnishing the information while applying for Recounting / Revaluation. The applications with insufficient information will be summarily rejected and the student has to forfeit the amount paid in this connection.

Challenge valuation:

- Applications are invited from the students who wish to apply for Challenge Valuation in the subjects of the B. Tech Regular and Supplementary examinations.
- The student will apply for Challenge valuation in a specified application and should be routed through the HOD concerned.
- The students who have applied for the revaluation for a paper(s) of an examination are only eligible for the Challenge Valuation of that paper(s) of that examination.
- A Fee of Rs. 10000/- (Ten Thousand Rupees Only) for each paper is to be paid within the last date for challenge valuation.
- A Xerox copy of the answer script will be provided to the student on receipt of the payment of fee and date and time of the valuation will be informed to the student, so that valuation will be done in the presence of the teacher attended in support of the student nominated by the HOD concerned.
- The HOD concerned will nominate a teacher of the subject concerned to observe the valuation in support of the student. This will be done at the request of the student.
- If the marks obtained in the challenge valuation are more than or equal to 15% of the maximum marks with respect to the original marks obtained in the first valuation, then the marks obtained in the Challenge valuation will be awarded to the student and the University will pay back Rs 9,000 (Nine thousand rupees only) to the student. If the student status changes from fail to pass, an amount of Rs. 5000 will be refunded to the student. Otherwise, there will not be any change in the result of the student and original marks will be retained and the student will forfeit the fee paid.
- No Challenge valuation for Laboratory Examination

APPENDIX III: Rules for Disciplinary Action for Malpractices / Improper Conduct in

Examinations

Malpractices identified by squad or special invigilators or invigilators.

Punishments shall be given to the students as per the above guidelines. The case is to be referred to the malpractice committee.

Malpractice committee

1. The Vice Chancellor, Chairman
2. Registrar, Member
3. Principal / Dean of respective College / School, Member
4. Dean, Academics, Member
5. Heads of the Department of respective Dept. / School, Member
6. Controller of Examinations, Member Secretary

Note:

Whenever the performance of a student is cancelled in any subject/subjects due to Malpractice, he/she has to register for End Examinations in that subject/subjects consequently and has to fill all the norms required for the award of Degree.

	Nature of Malpractices/Improper conduct	Punishment
	<i>If the candidate:</i>	
1.(a)	Possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the subject of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the subject of the examination)	Expulsion from the examination hall and cancellation of the performance in that subject only.
1(b)	Gives assistance or guidance or receives it from any other candidate orally or by any other body language methods or communicates through cell phones with any candidate or persons in or outside the exam hall in respect of any matter.	Expulsion from the examination hall and cancellation of performance in that subject only of all the candidates involved. In case of an outsider, he will be handed over to the police, and a case is registered against him.
2.	Has copied in the examination hall from any paper, book, programmable calculators, palm computers or any other form of material relevant to the subject of the examination (theory or practical) in which the candidate is appearing	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted to appear for the remaining examinations of the subjects of that semester/year. The Hall Ticket of the candidate is to be cancelled and sent to the registrar, Annamacharya University.
3.	Impersonates any other candidate in connection with the examination.	The candidate who has impersonated shall be expelled from examination hall. The candidate is also debarred for four consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic

		regulations in connection with forfeiture of seat. The performance of the original candidate who has been impersonated, shall be cancelled in all the subjects of the examination (including practical's and project work) already appeared and shall not be allowed to appear for examinations of the remaining subjects of that semester/year. The candidate is also debarred for four consecutive semesters from class work and all University examinations, if his involvement is established. Otherwise, the candidate is debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat. If the imposter is an outsider, he will be handed over to the police, and a case is registered against him.
4.	Smuggles in the Answer book or additional sheet or takes out or arranges to send out the question paper during the examination or answer book or additional sheet, during or after the examination.	Expulsion from the examination hall and cancellation of performance in that subject and all the other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.
5.	Uses objectionable, abusive or offensive language in the answer paper or in letters to the examiners or writes to the examiner requesting him to award pass marks.	Cancellation of the performance in that subject only.
6.	Refuses to obey the orders of the Chief Superintendent/Assistant — Superintendent / any officer on duty or misbehaves or creates disturbance of any kind in and around the examination hall or organizes a walk out or instigates others to walk out, or threatens the officer-in charge or any person on duty in or outside the examination hall of any injury to his person or to any of his relations whether by words, either spoken or written or by signs or by visible representation, assaults the officer-in-charge, or any person on duty in or outside the examination hall or any of his relations, or indulges in any other act of misconduct or mischief which result in damage to or destruction of property in the examination hall or any part of the University campus or engages in any other act which in	In case of student of the University, they shall be expelled from examination halls and cancellation of their performance in that subject and all other subjects the candidate(s) has (have) already appeared and shall not be permitted to appear for the remaining examinations of the subjects of that semester/year. If the candidate physically assaults the invigilator/officer-in-charge of the Examinations, then the candidate is also debarred and forfeits his/her seat. In case of outsiders, they will be handed over to the police, and a police case is registered against them.

	the opinion of the officer on duty amounts to use of unfair means or misconduct or has the tendency to disrupt the orderly conduct of the examination.	
7.	Leaves the exam hall taking away answer script or intentionally tears of the script or any part thereof inside or outside the examination hall.	Expulsion from the examination hall and cancellation of performance in that subject and all the other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all University examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.
8.	Possess any lethal weapon or firearm in the examination hall.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred and forfeits the seat.
9.	If students of the university, who is not a candidate for the particular examination or any person not connected with the University indulges in any malpractice or improper conduct mentioned in class 6 to 8.	Student of the university expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred and forfeits the seat. Person (s) who does not belong to the University will be handed over to police and, a police case will be registered against them.
10.	Comes in a drunken condition to the examination hall.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year.
11.	Copying detected on the basis of internal evidence, such as, during valuation or during special scrutiny.	Cancellation of the performance in that subject only or in that subject and all other subjects the candidate has appeared including practical examinations and project work of that semester / year examinations, depending on the recommendation of the committee.
12.	If any malpractice is detected which is not covered in the above clauses 1 to 12 shall be reported to the University for further action to award suitable punishment.

ANNAMACHARYA UNIVERSITY

(ESTD UNDER AP PRIVATE UNIVERSITIES (ESTABLISHMENT AND REGULATION) ACT, 2016)

(UNIVERSITY LISTED IN UGC AS PER THE SECTION 2(f) OF THE UGC ACT, 1956)

RAJAMPET, Annamayya District, AP – 516126, INDIA

Title of the Course: English for Engineers
Category : HSM
Year : I
Semester : I
Course Code : 24AENG11T
Branch/es : CSE, CSE(DS), AI&ML, CSE(AIML)

Lecture Hours
3

Tutorial Hours
0

Practice Hours
0

Credits
3

Course Objectives:

The course aims to enhance listening, reading, speaking, and writing skills of the students by improving their comprehension abilities and knowledge of grammatical structures and vocabulary. Through targeted instruction, students will develop effective speaking and writing capabilities, fostering a more comprehensive understanding of language use.

Course Outcomes:

At the end of the course, the student will be able to

1. Understand the context, topic, and pieces of specific information from social or transactional details.
2. Analyze literary forms, journalistic articles and scientific readings for comprehension and retention.
3. Demonstrate effective writing and speaking skills.
4. Apply grammatical knowledge in speaking and writing and formulate sentences with grammatical accuracy.
5. Produce coherent and unified paragraphs with adequate support and detail.

Unit 1

9

Lesson: A Proposal to Girdle the Earth

Reading: Skimming the text to get main ideas of it; scanning the text to look for specific pieces of information.

Writing: Mechanics of Writing - Capitalization, Spellings, Punctuation

Grammar: Parts of Speech, Content and Structure words, Basic Sentence Structures, Forming Questions

Vocabulary: Synonyms, Antonyms, Affixes (Prefixes/Suffixes), Root words

Unit 2

9

Lesson: The District School As It Was by One Who Went to It

Reading: Identifying the sequence of ideas; recognizing verbal techniques that help to link ideas in a paragraph together

Writing: Paragraph writing: Structure of a Paragraph, Cohesive devices - linkers

Grammar: Use of Articles and Zero Article; Prepositions

Vocabulary: Homonyms, Homophones, Homographs

Unit 3

9

Lesson: The Future of Work

Reading: Reading a text in detail by making basic inferences -recognizing and interpreting specific context clues; strategies to use text clues for comprehension

Writing: Summarizing, Note-making, paraphrasing

Grammar: Verbs - Tenses; Subject-verb Agreement

Vocabulary: Compound words, Collocations

Unit 4**9****Lesson:** H. G. Wells and the Uncertainties of Progress**Reading:** Studying the use of graphic elements in texts to convey information, revealing trends/patterns/relationships, communicate processes or display complicated data.**Writing:** Letter Writing: Official Letters, Resumes**Grammar:** Reporting verbs, Direct & Indirect speech, Active & Passive Voice**Vocabulary:** Words often confused, Jargon**Unit 5****8****Lesson:** Leaves from the Mental Portfolio of a Eurasian**Reading:** Reading comprehension.**Writing:** Writing structured essays on specific topics.**Grammar:** Editing short texts –identifying and correcting common errors in grammar and usage (articles, prepositions, tenses, subject verb agreement)**Vocabulary:** Technical Jargon**Prescribed Textbooks:**

Course Objectives:

The course aims to provide a strong foundation in the basic concepts of wave optics, lasers, and fiber optics, while also introducing students to crystal structures and X-ray diffraction techniques. It further explains key principles of dielectrics, magnetic materials, semiconductors, and superconductors, highlighting their importance and applications in various engineering fields.

Course Outcomes:

At the end of the course, the student will be able to

1. Understand interference, diffraction and polarization in engineering.
2. Explain the types of crystal structures and X-ray diffraction.
3. Analyze various types of polarization of dielectrics and magnetic materials.
4. Apply laser and fiber optics principles in communication field.
5. Describe the properties and behavior of semiconductors and superconductors.

Unit 1 Wave Optics

10

Interference: Introduction – Principle of superposition – Interference of light – Interference in thin films (Reflection Geometry)– Newton's Rings, determination of wavelength – Engineering applications of interference.

Diffraction: Introduction – Fresnel and Fraunhofer diffractions – Fraunhofer diffraction due to single slit, double slit & Diffraction Grating - Grating spectrum – Dispersive power of Grating– Engineering applications of diffraction.

Polarization: Introduction–Types of polarization– Double refraction – Nicol's Prism – Half wave and Quarter wave plates – Engineering applications of polarization.

Unit 2 Crystallography and X-ray diffraction

9

Crystallography: Space lattice, basis, unit cell and lattice parameters – 7 crystal systems- Bravais Lattices – coordination number – packing fraction of SC, Bcc & Fcc – Miller indices – separation between successive (hkl) planes.

X-ray diffraction: Bragg's law – X-ray Diffractometer –Laue's method and powder method.

Unit 3 Dielectric and Magnetic Materials

10

Dielectric Materials: Introduction – Dielectric polarization – Dielectric polarizability, susceptibility, dielectric constant and displacement vector – relation between the electric vectors – Types of polarizations– electronic, ionic, orientation (Qualitative) and Space charge (Qualitative) – Frequency dependence of polarization – Lorentz internal field – Clausius-Mossotti equation – Applications of dielectrics.

Magnetic Materials: Introduction – Magnetic dipole moment – Magnetization–Magnetic susceptibility and

permeability –Origin of magnetic moments – Classification of magnetic materials: Dia, para, ferro, anti-ferro & ferri magnetic materials – Hysteresis – soft and hard magnetic materials – Applications of magnetic materials.

Unit 4 LASERs and Fiber Optics

10

LASERs: Introduction – characteristics of lasers – spontaneous and stimulated emission of radiation – Einstein's coefficients – population inversion – pumping mechanism – He-Ne laser – semiconductor laser – Applications of lasers.

Fiber Optics: Introduction - Optical Fiber construction – Working principle (Total Internal Reflection & critical Angle) – Acceptance angle & Numerical Aperture of optical fiber – Classification of fibers based on Refractive index profile & modes (Step index and Graded index optical fibers) – optical fiber losses – Block diagram of fiber optic communication – Medical and Sensor Applications.

Unit 5 Semiconductors and Superconductors

9

Semiconductors: Formation of energy bands – classification of solids on the basis energy band theory- Intrinsic and Extrinsic semiconductors – Drift and diffusion currents – Einstein's equation–Direct and indirect band gap semiconductors- Hall Effect and its applications.

Superconductors: Properties of superconductors– Meissner's effect – Type-1 and Type-2 Superconductors – BCS Theory – Josephson effect (AC & DC) – Applications of superconductors.

Semester : I
Course Code : 24AMAT11T
Branch/es : Common to all branches

Lecture Hours

3

Tutorial Hours

0

Practice Hours

0

Credits

3

Course Objectives:

This course aims to familiarize students with matrix theory and its practical applications, equipping them with essential tools for mathematical and engineering problem-solving. It also focuses on imparting knowledge of partial derivatives, mean value theorems, and multiple integrals to effectively address real-world engineering challenges. Additionally, students will develop proficiency in vector differentiation and integration to solve complex engineering problems.

Course Outcomes:

At the end of the course, the student will be able to

1. Understand the methods for solving systems of linear equations.
2. Utilize matrix algebra techniques for engineering applications.
3. Analyze functions of several variables to optimization techniques.
4. Determine the area of solids using multiple integrals.
5. Apply vector integral theorems in evaluating double and triple integrals.

Unit 1 Matrices

10

Rank of a matrix by echelon form, normal form, solving system of homogeneous and non-homogeneous linear equations, Cayley-Hamilton theorem (without proof), finding inverse and power of a matrix by Cayley-Hamilton theorem.

Unit 2 Eigen values and Eigen vectors

8

Eigen values and Eigen vectors and their properties, diagonalization of a matrix, quadratic forms and nature of the quadratic forms, reduction of quadratic form to canonical form by orthogonal transformation.

Unit 3 Mean Value Theorems & Multivariable calculus

10

Taylor's theorem and Maclaurin's theorem for one variable (without proofs) – simple problems.

Partial derivatives, total derivatives, Chain rule, change of variables, Jacobian, Maxima and Minima of functions of two variables, method of Lagrange multipliers for three variables.

Unit 4 Multiple Integrals

8

Double integrals, change of order of integration, change of variables (Cartesian to polar), areas enclosed by plane curves, evaluation of triple integrals.

Unit 5 Vector Calculus

10

Vector differentiation: Scalar and Vector point functions, vector operator Del, del applies to scalar point functions-Gradient, directional derivative, del applied to vector point functions-Divergence and Curl.

Vector integration: Line integral - work done, surface integral, Green's theorem in the plane (without proof), Stoke's theorem (without proof), volume integral, divergence theorem (without proof) and related problems.

Credits
3

Course Objectives:

1. Understanding the steps in problem solving and formulation of algorithms to problems.
2. Develop programming skills as a means of implementing an algorithmic solution with appropriate control and data structures.
3. Develop intuition to enable students to come up with creative approaches to problems.
4. Develop programs using pointers, structures and unions.
5. Manipulation of text data using files.

Course Outcomes:

At the end of the course, the student will be able to

1. Demonstrate solutions to problems and represent those using algorithms/flowcharts.
2. Choose proper control statements and use arrays for solving problems.
3. Decompose a problem into modules and use functions to implement the modules.
4. Apply and use allocation of memory for pointers and solve the problems related to manipulation of text data using files and structures.
5. Develop the solutions for problems using c programming language.

Unit 1 Problem Solving and Introduction to C

9

Steps to solve problems, algorithm, Pseudo code, Flowchart with examples, Program Development.

Environments. Introduction to programming: Programming languages and generations.

Introduction to C: Introduction, structure of C program, keywords, identifiers, Variables, data types, constants, I/O statements, operators, precedence and associativity

Unit 2 Introduction to decision control statements and Arrays

9

Selective, looping and nested statements, jumping statements.

Arrays: Introduction, declaration of arrays, accessing and storage of array elements, searching (linear and binary search algorithms) and sorting (selection and bubble) algorithms, multidimensional arrays, matrix operations

Unit 3 Strings and Functions

9

Strings: Declaration and Initialization, String Input / Output functions, String manipulation functions.

Functions: Types of functions, recursion, scope of variables and storage classes.

Preprocessor Directives: Types of preprocessor directives, examples

Unit 4 Pointers

9

Pointers: Understanding computer 's memory, introduction to pointers, declaration pointer variables, pointer arithmetic, pointers and strings, array of pointers, function pointers, dynamic memory allocation, advantages and drawbacks of pointers

Unit 5 Structures and Files**9**

Structures: Structure definition, initialization and accessing the members of a structure, nested structures, array of structures, structures and functions, structures and pointers, self-referential structures, unions and enumerated data types.

Files: Introduction to files, file operations, reading and writing data on files, error handling during file operations.

Engineering Workshop Syllabus:

Course Objectives:

This course will enable the student to

1. Make familiar with different types of wooden joints.
2. Make conversant with tools used in sheet metal work.
3. Develop electrical wiring skills.
4. Have practical exposure to metal joining processes.
5. Gain knowledge with tools used in Plumbing and Fitting.

Course Outcomes:

At the end of the course, the student will be able to

1. Apply wood working skills to prepare different joints.
2. Develop sheet metal jobs with GI sheet.
3. Apply basic electrical engineering knowledge for house wiring practice.
4. Operate on different metal joining equipment.
5. Apply practical skills in trouble shooting the plumbing systems and various fittings.

Unit 1 Wood Working

6

Familiarity with different types of woods and tools used in wood working and making following joints.

- a) Cross- Lap joint
- b) Mortise and Tenon joint

Unit 2 Sheet Metal Working

6

Familiarity with different types of tools used in sheet metal working, Developments of following sheet metal job from GI sheet.

- a) rectangular tray
- b) Conical funnel

Unit 3 Electrical Wiring

6

Familiarity with different types of basic electrical circuits and make the following connections.

- a) Series connection and two switches, two bulbs in parallel connection.
- b) Staircase connection and tube light connection.

Unit 4 Metal Joining process

9

Familiarity with different types of tools used in metal joining process and practice on

- a) Soldering
- b) Brazing (preparation of Butt joint)
- c) Arc welding (Preparation of Lap joint)

Unit 5 Demonstration & Practice**3**

Demonstration and practice of Plumbing tools, Preparation of Pipe joints with coupling for same diameter and with reducer for different diameters.

a) Tap Connection

(For practice: branches other than civil & mechanical.

For Demonstration: civil & mechanical Branch)

Demonstration and practice of fitting tools.

Familiarity with different types of tools used in fitting and do the following fitting exercises.

a) Square-Fit

b) Dove-tail Fit

(For practice: civil & mechanical.

For Demonstration: branches other than civil & mechanical.)

IT Workshop Syllabus

Course Objectives:

This course will enable the student to

1. Demonstrate the disassembling and assembling of a personal computer system.
2. Demonstrate the Installation the operating system and other software required in a personal computer system.
3. Introduce connecting the PC on to the internet from home and work place and effectively usage of the internet, Usage of web browsers, email, news groups and discussion forums.
4. Introduce the usage of Productivity tools in crafting professional word documents, excel spreadsheets and power point presentations.
5. To utilize Cloud based productivity enhancement and collaboration tools.

Course Outcomes:

At the end of the course, the student will be able to

1. Interpret the peripherals of a computer, perform assembling and disassembling of various components of a computer.
2. Illustration of installation and un-installation of Windows and Linux operating systems and also perform troubleshooting of various hardware and software components.
3. Discuss about Web browsers to access Internet, Search Engines.
4. Apply and use word processor; spread sheet, presentation and data storage tools.
5. Analyze and Implement Cloud based productivity enhancement and collaboration tools.

Task 1

2

Learn about Computer: Identify the internal parts of a computer, and its peripherals. Represent the same in the form of diagrams including Block diagram of a computer. Write specifications for each part of a computer including peripherals and specification of Desktop computer. Submit it in the form of a report

Task 2

2

Assembling a computer: Disassemble and assemble the PC back to working condition. Students should be able. Student should Students should record the process of assembling and troubleshooting a computer.

Task 3

2

Install Operating System: Student should install Linux on the computer. Students should record the entire installation process.

Task 4

2

Networking: Students should connect two computers directly using a cable or wireless connectivity and share information. Students should connect two or more computers using switch/hub and share information. Crimping activity, logical configuration etc. should be done by the student. The entire process has to be documented.

Task 5

2

Browsing Internet: Student should access the Internet for Browsing. Students should search the Internet for required information. Students should be able to create e-mail accounts and send emails. They should get acquaintance with applications like Facebook, skype etc. If Intranet mailing facility is available in the organization, then students should share the information using it. If the operating system supports sending messages to multiple users (LINUX supports it) in the same network, then it should be done by the student. Students are expected to submit the information about different browsers available, their features, search process using different natural languages, and creating e-mail account

Task 6

2

Antivirus: Students should download freely available Antivirus software, install it and use it to check for threats to the computer being used. Students should submit information about the features of the antivirus used, installation process, about virus definitions, virus engine etc.

Task 7**4**

Word Processor: Students should be able to create documents using the word processor tool. Some of the tasks that are to be performed are inserting and deleting the characters, words and lines, Alignment of the lines, inserting header and Footer, changing the font, changing the colour, including images and tables in the word file, making page setup, copy and paste block of text, images, tables, linking the images which are present in other directory, formatting paragraphs, spell checking, etc. Students should be able to prepare project cover pages, content sheet and chapter pages at the end of the task using the features studied. Students should submit a user manual of the word processor considered.

Task 8**4**

Spreadsheet: Students should be able to create, open, save the application documents and format them as per the requirement. Some of the tasks that may be practiced are Managing the worksheet environment, creating cell data, inserting and deleting cell data, format cells, adjust the cell size, applying formulas and functions, preparing charts, sorting cells. Students should submit a user manual of the Spreadsheet application considered.

Task 9**4**

Presentations: creating, opening, saving and running the presentations, selecting the style for slides, formatting the slides with different fonts, colors, creating charts and tables, inserting and deleting text, graphics and animations, bulleting and numbering, hyper linking, running the slide show, setting the timing for slide show. Students should submit a user manual of the Presentation tool considered.

Task 10**2**

Store, sync, and share files with ease in the cloud-Google Drive

Document creation and editing text documents in your web browser- Google docs

Prescribed Textbooks:

1. Introduction to Information Technology, ITL Education Solutions limited, Pearson Education.
2. Upgrading and Repairing PC's, 22nd Edition, Scott Muller QUE, Pearson Education.
3. Comdex Information Technology Course Kit, Vikas Gupta, WILEY Dreamtech.
4. MOS 2010 Study Guide for Microsoft Word, Excel, PowerPoint, and Outlook Exams, 1st Edition, Joan Lambert, Joyce Cox, Microsoft Press.

Title of the Course: English Language Communication Skills Lab

Category : HSM

Year : I

Semester : I

Course Code : 24AENG11L

Branch/es : CSE, CSE(DS), AI&ML, CSE(AIML)

Lecture Hours	Tutorial Hours	Practice Hours	Credits
0	0	2	1

Course Objectives:

The main objective of introducing this course is to expose the students to a variety of self-instructional, learner-friendly modes of language learning. The students will get trained in basic communication skills.

Course Outcomes:

At the end of the course, the student will be able to

1. Relate and differentiate English speech sounds, stress, rhythm, intonation and syllable division for better listening and speaking comprehension.
2. Develop communication skills through various language learning activities.
3. Demonstrate professional skills in participating role-plays and descriptions.
4. Build effective resonance and equip themselves with employability skills.
5. Enhance public speaking skills and deliver oral presentations with clarity and confidence.

List of Topics

1. Phonetics: Vowels / Consonants; Accent Rules
2. Just a Minute
3. Role Play / Situational Dialogues
4. Oral Presentation
5. Information Transfer
6. Describing people/Objects/Situations

Suggested Software:

1. Sky Pronunciation Suite
2. Clarity Pronunciation Power – Part I
3. Learning to Speak English - 4 CDs
4. Lose Your Accent in 28 days, CD Rom, Judy Ravin

Reference Books:

Course Objectives:

This course aims to provide a comprehensive understanding of interference and diffraction, including their practical applications and the significance of optical fiber parameters in communication. It emphasizes the role of energy gaps in semiconductor conductivity and the Hall effect, explores the applications of magnetic and dielectric materials, and applies semiconductor principles to various electronic devices.

Course Outcomes:

At the end of the course, the student will be able to

1. Operate various optical instruments to measure optical parameters.
2. Determine the magnetic and dielectric parameters by various methods.
3. Evaluate various parameters of semiconductors by different methods.
4. Estimate general parameters of materials.

List of Experiments

1. Determination of the thickness of the wire using wedge method.
2. Determination of the radius of curvature of the lens by Newton's ring method.
3. Determination of wavelength of light radiation using plane diffraction grating by spectrometer.
4. Determination of Dispersive power of a diffraction grating.
5. Determination of Particle size using laser.
6. Determination of dielectric constant by bridge resonance method.
7. Determination of Magnetic field along the axis of a circular coil carrying current by Stewart-Gee's method.
8. Determination of Wavelength of laser by using Diffraction grating.
9. Determination of Hysteresis loss of ferro magnetic material by tracing B-H curve.
10. Determination of the numerical aperture and acceptance angle of an optical fiber.
11. Determination of the rigidity modulus of metal wire by using torsional pendulum.
12. Determination of Hall coefficient and carrier concentration of a given semiconductor using Hall effect.
13. Determination of the resistivity of semiconductor by Four probe method.
14. Determination of the energy gap of a semiconductor by using P-N Junction diode.
15. Determination of resistance with varying temperature using thermistor

Course Objectives:

1. Setting up programming environment.
2. Develop Programming skills to solve problems.
3. Use of appropriate C programming constructs to implement algorithms.
4. Identification and rectification of coding errors in program.
5. Develop applications using a modular programming and Manage data using files.

Course Outcomes:

At the end of the course, the student will be able to

1. Identify and setup program development environment.
2. Develop the algorithms using c programming language constructs.
3. Analyze and rectify the syntax errors and debug program for semantic errors.
4. Demonstrate problems in a modular approach using functions.
5. Assessing file operations with simple text data.

A minimum number of FOUR programs from each exercise is to be done students.

Data Types, Constants, Input and Output and expressions

Exercise 1: Data types, Variables, Constants and Input and Output.

Exercise 2: Operators, Expressions and Type Conversions.

Decision Control Statements and Arrays

Exercise 3: Conditional Statements [two way and multipath].

Exercise 4: Loop Control Statements. [for, while and do-While]

Exercise 5: Unconditioned JUMP Statements- break, continue, goto.

Exercise 6: Declaring Arrays, Referencing Arrays, Array Subscripts. Using for loop for sequential Access.

Exercise 7: Multidimensional Arrays

Strings and Functions

Exercise 8: String Basics, String Library Functions and Array of Strings.

Exercise 9: Simple user defined functions, Parameter passing methods- pass by value, pass by reference.

Exercise 10: Storage classes- Auto, Register, Static and Extern

Exercise 11: Recursive Functions, Preprocessor commands.

Exercise 12: Array Elements as Function Arguments

Pointers

Exercise 13: Pointers, Dynamic memory allocation and error handling

Structures and Files

Exercise 14: Structures

Exercise 15: File handling

Course Objectives:

The course aims to enhance students' global communication skills through foreign language acquisition while fostering cultural awareness and appreciation of diverse backgrounds. It provides a flexible learning platform with a range of reputable online courses, empowering students to tailor their educational experiences. Additionally, the course allows to focus on career development by equipping students with valuable language skills that enhance their employability.

Course Outcomes:

At the end of the course, the student will be able to

1. Enhance their global communication skills by learning foreign language of their choice.
2. Understand cultural diversity.
3. Apply a variety of reputed online courses and enjoy flexible learning.
4. Acquire additional language skills to secure suitable job opportunities.
5. Analyze the ability in self-paced learning.

Guidelines:

1. **Course Selection:** Students can choose from the following languages:
 - German
 - French
 - Spanish
 - Arabic
2. **Approved Platforms:** Courses must be taken from recognized MOOC platforms such as NPTEL, Coursera, Udemy, or edX.
3. List of recommended courses:
 - German: <https://www.udemy.com/course/german-course-for-beginners-learn-german>
 - French: <https://www.udemy.com/course/complete-french-course>
 - Spanish: <https://www.udemy.com/course/el-metodo-spanish-1>
 - Arabic: <https://www.udemy.com/course/arabic-a21/>
4. **Enrolment Verification:** Students must submit proof of enrolment in the chosen course to the academic office of I Year at the beginning of the semester.
5. **Minimum Course Duration:** The selected course should be a minimum of 4 weeks in duration.
6. **Progress Reports:** Students are encouraged to submit progress reports periodically to their course mentor.
7. **Completion Deadline:** The course must be completed by the end of the semester.
8. **Certificate Submission:** Students must submit the certificate of completion issued by the MOOC platform to the Head, First Year Academics.

Policies

1. **Credit Allocation:** Upon successful completion and submission of the certificate, students will be awarded 1 academic credit.
2. **Grading:** The course will be graded on a Pass/Fail basis. A pass grade is awarded upon verification of the completion certificate.
3. **Integrity and Authenticity:** The submitted certificate must be authentic and verifiable. Any attempt to submit falsified documents will result in disciplinary action.
4. **Support:** Students can seek support from language faculty/course mentors if they encounter any difficulties during the course.
5. **Non-Completion:** Failure to complete the course within the stipulated time frame will result in no credit being awarded, and the elective will need to be retaken

A committee shall be formed at the level of the University to evaluate the grades / marks given for a course by external agencies and convert to the equivalent marks / grades. The recommended conversions and appropriate grades / marks are to be approved by the Academic Council of the University.

Year : I
Semester : II
Course Code : 24ACHE21T
Branch/es : CSE, CSE(DS), AI&ML, CSE(AIML)

Lecture Hours	Tutorial Hours	Practice Hours	Credits
3	0	0	3

Course Objectives:

The course aims to familiarize students with the fundamentals of engineering chemistry and its practical applications. It provides training on key principles of electrochemistry and polymers, while also introducing students to various instrumental methods. Additionally, the course highlights the importance of green energy and e-waste management, emphasizing their relevance in modern engineering practices.

Course Outcomes:

At the end of the course, the student will be able to

1. Discuss quantum mechanics and molecular orbital theory to interpret bonding, energy levels, and bond order in various molecules.
2. Demonstrate the construction and functionality of various sensors, batteries, and fuel cells through practical examples.
3. Summarize the preparation, characteristics, and applications of various polymers in real-world contexts.
4. Utilize principles of various analytical techniques to evaluate nanomaterials effectively.
5. Analyze sustainable energy solutions and develop strategies for effective e-waste management.

Unit 1 Structure and bonding models 9

Fundamentals of Quantum mechanics, Schrodinger wave equation, significance of Ψ and Ψ^2 , particle in one dimensional box, molecular orbital theory – bonding in homo and heteronuclear diatomic molecules – energy level diagrams of O_2 and CO , etc. π -molecular orbitals of butadiene and benzene, calculation of bond order.

Unit 2 Electrochemistry and applications 8

Electrochemical cell, Nernst equation, cell potential calculations and numerical problems, types of electrodes - indicator and reference electrodes. Electrochemical sensors – potentiometric and amperometric sensors with examples.

Primary cells – Dry cell, secondary cells – Lithium-ion batteries - working of the batteries including cell reactions; Fuel cells, Hydrogen-Oxygen fuel cell – working of the cell.

Unit 3 Polymer chemistry 8

Introduction to polymers, functionality of monomers, Thermoplastics and Thermo-setting plastics, properties and applications of PVC and Bakelite.

Fibres - polyesters, mechanical requirements for fibres - crystallinity, stress strain curves. Biodegradable polymers - properties and applications of Poly Glycolic Acid (PGA), Polylactic Acid (PLA).

Elastomers – properties and applications of Buna-S, Buna-N, Thiokol.

Conducting polymers – Polyacetylene – mechanism of conduction and applications.

Unit 4 Nanomaterials and instrumental methods

9

Nanomaterials - Introduction, classification, synthesis of nanomaterial by Sol-gel method, properties and applications of carbon-based nanomaterials - CNT and Graphene.

Electromagnetic spectrum, absorption of radiation: Beer-Lambert's law. UV-Visible spectroscopy, principle, instrumentation and applications, IR spectroscopy – principle, instrumentation and applications, Potentiometry - potentiometric titrations (redox titrations), Conductometric titrations (acid-base titrations).

Unit 5 Alternative energy sources and e-waste management

8

Green Fuels: Introduction, construction and working of photovoltaic cell, applications, generation of green hydrogen energy by electrolysis of water and its advantages.

e-waste management: Introduction, sources of e-waste, composition and health hazards of toxic materials present in electronic and electrical e-waste, need for e-waste management, recycling and recovery; different approaches of recycling, extraction of Gold from e-Waste.

Course Objectives:

The course aims to develop proficiency in solving ordinary and partial differential equations, emphasizing their application in engineering and scientific contexts. It will cover Laplace Transforms and their inverses, illustrating their role in solving engineering and real-world problems. Additionally, the course will introduce Fourier Series and Fourier Transforms, focusing on their practical applications for addressing real-life challenges.

Course Outcomes:

At the end of the course, the student will be able to

1. Describe the application of higher order differential equations with constant coefficients in modeling dynamic systems.
2. Solve the standard partial differential equations relevant to engineering scenarios.
3. Utilize the Laplace transformations to handle various types of functions in engineering context.
4. Analyze ordinary differential equations by employing Laplace transformations for solutions derivation.
5. Apply Fourier series and Fourier transforms in engineering context.

Unit 1 Linear differential equations of higher order with constant Coefficients 10

Basic concepts - general solution-operator D-rules for finding complimentary function-inverse operator-rules for finding particular integral for RHS term of the type e^{ax} , $\sin ax / \cos ax$, polynomials in x , $e^{ax} \sin ax / e^{ax} \cos ax / e^{ax} x^n$, $x \sin ax / x \cos ax$ -method of variation of parameters

Unit 2 Partial Differential Equations 8

Introduction and formation of Partial Differential Equations by elimination of arbitrary constants and arbitrary functions, solutions of first order linear equations using Lagrange's method, non-linear PDEs (Charpit's method), method of separation of variables for second order linear partial differential equations.

Unit 3 Laplace transforms 8

Laplace transforms of standard functions- first shifting theorem - change of scale property - multiplication by t^n - division by t - transforms of derivatives and integrals - Unit step function – second shifting theorem– Laplace transform of periodic functions (without proofs).

Unit 4 Inverse Laplace transforms 8

Inverse Laplace transforms (without proofs) – Convolution theorem (without proof).
Applications of Laplace transforms to ordinary differential equations of first and second order with constant coefficients.

Unit 5 Fourier series and Fourier Transforms**10****Fourier series:** Dirichlet conditions - functions of any period - odd and even functions - half range series.**Fourier Transforms:** Fourier integrals - Fourier cosine and sine integrals - Fourier transform - sine and cosine transform.**Prescribed Textbooks:**

Course Objectives:

1. To understand the fundamental laws and circuit elements.
2. To analyze the working of various Machines.
3. To summarize the different Energy Resources, various Measuring Instruments and importance of Safety Measures.
4. To describe the various Electronic Devices.
5. To Illustrate the concepts of Bipolar Junction transistor and Diode Applications.

Course Outcomes:

At the end of the course, the student will be able to

1. Understand the fundamental laws and circuit elements.
2. Analyze the Working of DC and AC Machines.
3. Summarize the different Energy Resources, various Measuring Instruments and importance of Safety Measures.
4. Analyze basic Semiconductor devices.
5. Illustrate the concepts of Bipolar Junction transistor and Diode Applications.

Unit 1 Fundamental Laws and Electrical Circuits

9

Basic definitions - Voltage, current, power, energy, charge, flux, static and dynamic emf, Faraday's laws of electromagnetic induction, Fleming's right hand rule, Fleming's left hand rule, Lenz's law, Cork screw rule, Right hand thumb rule, Right hand palm rule. Types of elements, Types of sources, ohms law, resistive, inductive, capacitive networks, Series-parallel circuits and Kirchhoff's laws- (Basic Numerical Problems).

Unit 2 DC Machines and Transformers

9

DC Generator: Constructional Details of DC machine, Principle of operation, emf equation, types of generators, applications. (Basic Numerical Problems on EMF equation)

DC Motor: principle of operation, torque equation, types, losses and efficiency, applications, Brake test, Speed control methods. (Basic Numerical Problems).

Transformers: 1- Φ Transformer: Principle of operation, emf equation, losses and efficiency calculations using OC and SC tests.

Unit 3 Energy Resources, Measuring Instruments & Safety Measures

9

Energy Resources: Conventional and non-conventional energy resources; Layout and operation of Hydel, Solar & Wind power generation.

Measuring Instruments: Construction and working principle of Permanent Magnet Moving Coil (PMMC), Moving Iron (MI) Instruments and CRO.

Equipment Safety Measures: Working principle of Fuse and Miniature circuit breaker (MCB), merits and demerits. Personal safety measures: Electric Shock, Earthing and its types, Safety Precautions to avoid shock.

Unit 4 Semiconductor Devices 9
Energy Band Diagram of Semiconductors (Intrinsic & Extrinsic), PN Diode, V-I Characteristics of PN Junction Diode, Applications of diode-Breakdown Mechanisms in semiconductor diodes, Zener diode characteristics and Zener diode acts as a regulator.

Unit 5 Diode Applications and Introduction to Transistors 9
Half Wave and Full Wave Rectifiers – Different parameters and comparison, General Filter Considerations – Capacitor Filter. Transistor constructions – Types, Transistor operation in CE configuration and its Characteristics.

Course Objectives:

1. Understand the significance of linear data structures in problem-solving and basic time/space complexity analysis.
2. Create and manage linked lists to efficiently organize and manipulate data, emphasizing memory efficiency.
3. Implement and apply stacks and queues to manage program flow and solve problems involving expression evaluation and backtracking.
4. Understand the importance of non-linear data structures Trees and Graphs.
5. Explore basic concepts of hashing and apply it to solve problems requiring fast data retrieval and management.

Course Outcomes:

At the end of the course, the student will be able to

1. Interpret the role of linear data structures in organizing and accessing data efficiently.
2. Apply linked lists for dynamic data storage and understanding of memory allocation.
3. Develop programs using stacks to handle recursive algorithms, manage program states, and solve related problems.
4. Analyze queue-based algorithms for efficient task scheduling and breadth-first traversal in graphs and distinguish between de-queues and priority queues and apply them appropriately to solve data management challenges.
5. Recognize scenarios where hashing is advantageous, and design hash-based solutions for specific Problems.

Unit 1 Introduction to Linear Data Structures

9

Introduction to Linear Data Structures: Definition and importance of linear data structures, Abstract data types (ADTs) and their implementation, Overview of time and space complexity analysis for linear data structures.

Unit 2 Linked Lists

9

Linked Lists: Singly linked lists: representation and operations, doubly linked lists and circular linked lists, Comparing arrays and linked lists, Applications of linked lists.

Unit 3 Stacks, Queues and De-queues

9

Stacks: Introduction to stacks: properties and operations, implementing stacks using arrays and linked lists, Applications of stacks in expression evaluation, backtracking, reversing list etc.

Queues: Introduction to queues: properties and operations, implementing queues using arrays and linked lists, Applications of queues in breadth-first search, scheduling, etc.

De-queues: Introduction to De-queues (double-ended queues), Operations on De-queues and their applications.

Unit 4 Introduction to non-linear Data Structures**9**

Trees: Introduction to Trees, Binary Trees, creation of binary tree, Operations on Binary Tree. Introduction to Binary Search Tree, Operations on Binary Search Trees.

Graphs: Defining graph, basic terminology, graph representation.

Unit 5 Hashing**9**

Hashing: Brief introduction to hashing and hash functions, Collision resolution techniques: chaining and open addressing, Hash tables: basic implementation and operations, Applications of hashing in unique identifier generation, caching, etc.

Course Objectives:

1. To learn basics of computational problem solving, python programming and basic control structures.
2. To understand python programming basic constructs like lists, dictionaries, sets and functions.
3. To apply module design and usage of text files in python programming.

Course Outcomes:

At the end of the course, the student will be able to

1. Interpret computational problem solving and basic elements of python programming.
2. Analyze python programming basics like lists, tuple, dictionaries, and sets.
3. Demonstrate functions in python programming.
4. Evaluate string processing applications and exception handling in python programming.
5. Develop programs using class and object in python programming.

Unit 1 Introduction to python programming language 9

Introduction to python programming language, literals, variables and identifiers, operators, expressions and data types. Control Structures: Boolean expressions, selection control, and iterative control.

Unit 2 Lists 9

Lists: List structures, lists in python, iterating over lists in python, more on python lists. Dictionaries and sets, tuple.

Unit 3 Functions 10

Functions: Program routines, more on functions, Module Design: Modules, Top-Down design, python modules.

Unit 4 Text Files 8

Text Files: Text File, Using Text files, string processing, exception handling.

Unit 5 Introduction to object-oriented programming 11

Introduction to Object oriented programming: class, three fundamental features of object-oriented programming, encapsulation-what is encapsulation, defining classes in python. Inheritance: subtypes, defining subclasses in python, Polymorphism: use of polymorphism.

Prescribed Textbooks:

1. Introduction to Computer Science Using Python: A Computational Problem-Solving Focus, Charles Dierbach.

Reference Books:

1. Python Programming using problem solving approach, ReemaThareja, Oxford University press.
2. Python Programming: An Introduction to Computer Science, John Zelle, Franklin,Beedle & Associates Inc.,3rd Edition.

3

Course Objectives:

1. To enable the students with various concepts like dimensioning, conventions and standards related to Engineering Drawing.
2. To impart knowledge on the projection of points, lines and plane surfaces.
3. To improve visualization skills for better understanding of projection of solids.
4. To develop the imaginative skills of the students required to understand Section of solids and Developments of surfaces.
5. To make the students understand the viewing perception of a solid object in Isometric and Perspective projections.

Course Outcomes:

At the end of the course, the student will be able to

1. Apply the appropriate annotations and geometric techniques to draw the conic sections, cycloidal curves and involutes.
2. Apply the principles of orthographic projection for engineering problems involving inclined lines to create drawings that represent real-world objects.
3. Apply the principles of orthographic projection for solving engineering problems of planes with respect to both reference planes.
4. Apply the principles of orthographic projection for solving engineering problems of solids.
5. Apply the conversion techniques to solve problems related to orthographic projections and isometric projection views.

Unit 1

5

Introduction: Lines, Lettering and Dimensioning, Geometrical Constructions and Constructing regular polygons by general method.

Engineering Curves:

Construction of Ellipse, Parabola and Hyperbola by General Method - Normal and tangent

Cycloid & Epicycloid curves (basic problem) - Normal and tangent

Involute of Square, Pentagon - Normal and tangent

Unit 2

3

Orthographic Projections: Reference plane, importance of reference lines or Planes, Projections of a point situated in any one of the four quadrants.

Projections of Straight Lines: Projections of straight lines parallel to both reference planes, perpendicular to one reference plane and parallel to other reference plane, inclined to one reference plane and parallel to the other reference plane, Projections of Straight Line Inclined to both the reference planes.

Unit 3

Projections of Planes (Square, Circle, Pentagon, Hexagon): A Plane perpendicular to one reference plane and parallel to other, A plane Perpendicular to both reference planes, A plane perpendicular to one reference plane and inclined to the other, A plane inclined to both the reference planes.

Unit 4

5

Projections of Solids: Projections of solids (Prism, Pyramid, Cylinder and Cone): Axis perpendicular to Horizontal reference plane and parallel to other, Axis inclined to Horizontal reference plane and parallel to another plane.

Development of Surfaces: Simple Developments of a prism, cylinder, Pyramid and Cone

Unit 5

5

Isometric Projections / Conversions: Principles of Isometric Projection – Isometric Scale – Isometric Views of Lines, Planes, Conversion of orthographic views to isometric views (simple problems) and Conversion of isometric views to orthographic views (simple problems)

Course Objectives:

The course aims to equip students with practical skills in Conductometry, Potentiometry, and Colorimetry for precise chemical analysis. It also provides hands-on experience in synthesizing polymers and nanomaterials, emphasizing their industrial relevance. Additionally, students are trained in separation techniques and UV-Visible spectroscopy for material identification, while enhancing their ability to perform quantitative chemical analyses, such as metal estimation and battery acid strength determination.

Course Outcomes:

At the end of the course, the student will be able to

1. Determine the strength of an acid present in secondary batteries.
2. Calculate the cell constant and conductance of solutions.
3. Estimate metal ions by using various analytical techniques.
4. Analyse the separation methods used for various organic compounds.
5. Synthesize nanomaterials and polymers.

List of experiments

1. Conductometric titration of strong acid vs. strong base.
2. Determination of cell constant and conductance of solutions.
3. Potentiometry - determination of redox potentials and emfs.
4. Determination of strength of an acid in Pb-acid battery.
5. Preparation of Poly Methyl Methacrylate (PMMA).
6. Preparation of Poly Glycidyl Methacrylate (PGMA).
7. Determination of chromium (VI) in potassium dichromate by Colorimetry.
8. Estimation of Zinc by EDTA titration.
9. Preparation of nanomaterials by precipitation method.
10. Identification of simple organic compounds by IR spectroscopy.
11. Estimation of Ferrous Iron by Dichrometry.
12. Wavelength measurement of sample through UV-Visible Spectroscopy.

1. To identify the various electrical and electronic components and devices.
2. To impart knowledge and practical exposure on various elements of electrical circuits, operational aspects of various electrical machines and electronic circuits.
3. To analyze the performance of rectifier circuits in practical approach.
4. To observe the characteristics of semiconductor devices.

Course Outcomes:

At the end of the course, the student will be able to Blooms Level of Learning

1. Identify the various Electrical and Electronic Components and Devices.
2. Analyze various characteristics of electrical circuits, electrical machines and measuring instruments circuits.
3. Analyze the characteristics of various semiconductor devices through practical investigations.
4. Comprehend the usage of Electronic devices as half wave and full wave rectifier.

List of Experiments	
S.NO	Name of Experiments
1	Identification, Specifications, Testing of R, L, C Components (Color Codes), Potentiometers, Switches (SPDT, DPDT, and DIP), Coils, Gang Condensers, Relays, Bread Boards, PCBs, Diodes, BJT)
2	Study and operation of • Multi-meters (Analog and Digital) • Function Generator • Regulated Power Supplies
3	Verification of KCL and KVL
4	Measurement of resistance by using Ammeter and Voltmeter method
5	Measurement of Earth Resistance using Megger
6	Speed control of a DC Shunt Motor

Course Objectives:

The course aims to strengthen the ability of the students to identify and apply suitable data structure for the given real-world problem. It enables them to gain knowledge in practical applications of data structures.

Course Outcomes:

At the end of the course, the student will be able to

1. Interpret the role of linear data structures in organizing and accessing data efficiently.
2. Apply linked lists for dynamic data storage and understanding of memory allocation.
3. Develop programs using stacks to handle recursive algorithms, manage program states, and solve related problems.
4. Analyze queue-based algorithms for efficient task scheduling and breadth-first traversal in graphs and distinguish between de-queues and priority queues and apply them appropriately to solve data management challenges.
5. Recognize scenarios where hashing is advantageous, and design hash-based solutions for specific problems.

PART-A

WEEK 1: Linked List Implementation

Implement a singly linked list to perform all of its operations.

WEEK 2: Double Linked List Implementation

- i) Implement a doubly linked list and perform all of its operations.
- ii) Implement a circular linked list and perform insertion, deletion, and traversal.

WEEK 3: Stacks, Queues and De-queues

- i) Implement a stack using arrays and linked lists.
- ii) Implement a queue using arrays and linked lists.

WEEK 4: Stacks Applications

- i) Write a program to evaluate a postfix expression using a stack.
- ii) Use a stack to evaluate an infix expression and convert it to postfix.
- iii) Implement a program to check for balanced parentheses using a stack.

WEEK 5: Binary Search Tree Implementation:

- i) Implementing BST operations using Linked List.

WEEK 6: Binary Search Tree Traversing:

- i) Traversing of BST.

WEEK 7: Implementation of Hashing:

- i) Implement a hash table with collision resolution techniques

PART-B

WEEK 1: Python Basics, Conditions and Loops

- Write a Python Program to check if a number is a prime number.
- Write a python program to generate the Fibonacci sequence up to a given number of terms.
- Write a python program to find the largest prime factor of a given number.

WEEK 2: Python Lists, Dictionaries, and Tuples

- Write a Python Program to manage a To-Do List.
- Write a Python Program to create Contact Book Using Dictionaries.
- Write a Python Program to demonstrate Tuples.

WEEK 3: Python Functions and Files

- Write a Python Function for finding Prime Numbers in a range.
- Write a Python function to perform matrix multiplication.
- Write a Python Program to read and Print File Contents.
- Write a Python Program to write a user input to a file.
- Write a Python Program to append a user input to a file.

WEEK 4: Single Linked List and Double Linked List Implementation

- Implement a singly linked list to perform all of its operations.
- Implement a doubly linked list and perform all of its operations.

WEEK 5: Stacks, and Queues

- Implement a stack using arrays and linked lists.
- Implement a queue using arrays and linked lists.

WEEK 6: Binary Search Tree Implementation:

- Implementing a BST operations using Linked List.

WEEK 7: Binary Search Tree Traversing:

- Traversing of BST.

Course Objectives:

The course aims to build a strong foundation in discrete mathematics with emphasis on logical reasoning and problem-solving. It covers mathematical logic, recurrence relations, relations, functions, algebraic structures, graph theory, and trees. Students will learn techniques for analyzing algorithms, switching circuits, coding theory, and traversal methods. Overall, the course equips learners with essential mathematical tools for applications in computer science and engineering.

Course Outcomes:

At the end of the course, the student will be able to

1. Understand and apply the logic statements and express logical sentences in terms of logical connectives.
2. Analyze the various types of recurrence relations and apply the methods to find out their solutions.
3. Understand sets, relations, functions, and discrete structures.
4. Apply graph theory concepts in core subjects such as data structures and network theory effectively.
5. Apply the properties of Trees in Engineering applications.

Unit 1 Mathematical logic

12

Statements and Notations, Connectives, Well Formed Formulas, Truth Tables, Tautologies, Equivalence of Formulas, Duality Law, Tautological Implications, Normal Forms, Theory of Inference for Statement Calculus. Applications to switching circuits.

Unit 2 Recurrence relations

9

Generating functions of sequences, calculating coefficients of generating functions, Recurrence relations - Solving homogeneous and non-homogeneous recurrence relations of first and second order by substitution and generating functions, method of characteristic roots. Applications of recurrence relation.

Unit 3 Relations and functions

10

Relations and functions: Properties of binary relations in a set, relation matrix and the graph of a relation, partition and covering of a set, equivalence relations, compatibility relations, partial ordering, Hasse diagram, functions - composition of functions, inverse functions.

Algebraic structures: algebraic systems, simple algebraic systems and general properties, semi group and monoid, group (Simple problems only). Applications to coding theory.

Unit 4 Graph theory**9**

Definitions, finite and infinite graphs, incidence and degree, isolated and pendant vertices, Graph Representations- Adjacency and Incidence Matrices, isomorphism, sub graphs, walk, path and circuit, connected and disconnected graphs, components, Multi graphs, Bipartite and Planar Graphs, Euler's formula, Euler graphs, , Hamiltonian paths and circuits, Graph Traversal technique-travelling salesman problem.

Unit 5 Trees**8**

Some properties of trees, distance and centers, rooted and binary trees, Spanning Trees: DFS, BFS, Minimal Spanning Trees, Tree traversal technique-Kruskal's Algorithm.

Course Objectives:

The course aims to help students recognize the vital interplay between values and skills, promoting sustained happiness and prosperity. It seeks to foster a holistic perspective on life and profession, encouraging value-based living through a clear understanding of human reality and existence. Additionally, the course emphasizes the ethical implications of such an understanding, fostering trustful behaviour, fulfilling human interactions, and a harmonious relationship with nature.

Course Outcomes:

At the end of the course, the student will be able to

1. Comprehend the terms like Natural Acceptance, Happiness and Prosperity.
2. Analyze one's self, and one's surroundings (family, society, nature).
3. Apply human values in enriching human relationships and human society.
4. Analyze the need for universal human values and harmonious existence.
5. Evaluate themselves as socially and ecologically responsible engineers.

Unit 1 Introduction to Value Education

12

Lecture1: Right Understanding, Relationship and Physical Facility (Holistic Development and the Role of Education)

Lecture2: Understanding Value Education

Tutorial 1: Practice Session1: Sharing about oneself

Lecture 3: Self-Exploration as the Process for Value Education

Lecture4: Continuous Happiness and Prosperity – The Basic Human Aspirations

Tutorial 2: Practice Session2: Exploring Human Consciousness

Lecture 5: Happiness and Prosperity – Current Scenario

Lecture 6: Method to Fulfill the Basic Human Aspirations

Tutorial 3: Practice Session3: Exploring Natural Acceptance

Unit 2 Harmony in the Human Being

8

Lecture 7: Understanding Human being as the co-existence of the self and the body.

Lecture 8: Distinguishing between the needs of the self and the body

Tutorial 4: Practice Session4: Exploring the difference of needs of self and body.

Lecture 9: The body as an instrument of the self

Lecture 10: Understanding harmony in the self

Tutorial 5: Practice Session5: Exploring sources of imagination in the self

Lecture 11: Harmony of the self with the body

Lecture 12: Programme to ensure self-regulation and health

Tutorial 6: Practice Session 6: Exploring harmony of self with the body

Unit 3 Harmony in the Family and Society**8**

Lecture 13: Harmony in the Family – the Basic Unit of Human Interaction
Lecture 14: 'Trust' – the Foundational Value in Relationship
Tutorial 7: Practice Session7: Exploring the Feeling of Trust
Lecture 15: 'Respect' – as the Right Evaluation
Tutorial 8: Practice Session 8: Exploring the Feeling of Respect
Lecture 16: Other Feelings, Justice in Human-to-Human Relationship
Lecture 17: Understanding Harmony in the Society
Lecture 18: Vision for the Universal Human Order
Tutorial 9: Practice Session9: Exploring systems to fulfil human goal

Unit 4 Harmony in the Nature/Existence**10**

Lecture 19: Understanding Harmony in the Nature
Lecture 20: Interconnectedness, Self-Regulation and Mutual Fulfilment among the Four Orders of Nature
Tutorial 10: Practice Session 10: Exploring the Four Orders of Nature
Lecture 21: Realizing Existence as Co-existence at All Levels
Lecture 22: The Holistic Perception of Harmony in Existence
Tutorial 11: Practice Session11: Exploring Co-existence in Existence

Unit 5 Implications of the Holistic Understanding – A Look at Professional Ethics**10**

Lecture 23: Natural Acceptance of Human Values
Lecture 24: Definitiveness of (Ethical) Human Conduct
Tutorial 12: Practice Session 12: Exploring Ethical Human Conduct
Lecture 25: A Basis for Humanistic Education, Humanistic Constitution and Universal Human Order
Lecture 26: Competence in Professional Ethics
Tutorial 13: Practice Session13: Exploring Humanistic Models in Education
Lecture 27: Holistic Technologies, Production Systems and Management Models-Typical Case Studies
Lecture 28: Strategies for Transition towards Value-based Life and Profession
Tutorial 14: Practice Session14: Exploring Steps of Transition towards Universal Human Order

Practice Sessions for UNIT I – Introduction to Value Education

PS1 Sharing about Oneself
PS2 Exploring Human Consciousness
PS3 Exploring Natural Acceptance

Practice Sessions for UNIT II – Harmony in the Human Being

PS4 Exploring the Difference of Needs of Self and Body
PS5 Exploring Sources of Imagination in the Self
PS6 Exploring Harmony of Self with the Body

Practice Sessions for UNIT III – Harmony in the Family and Society

PS7 Exploring the Feeling of Trust
PS8 Exploring the Feeling of Respect
PS9 Exploring Systems to fulfil Human Goal

Practice Sessions for UNIT IV – Harmony in the Nature (Existence)

PS10 Exploring the Four Orders of Nature
PS11 Exploring Co-existence in Existence

Practice Sessions for UNIT V – Implications of the Holistic Understanding – a Look at Professional Ethics

PS12 Exploring Ethical Human Conduct
PS13 Exploring Humanistic Models in Education
PS14 Exploring Steps of Transition towards Universal Human Order

Course Objectives:

This course will be able to

1. Understand and Analyse the time and space complexity of algorithms using asymptotic notations.
2. Study advanced data structures like AVL trees, B-trees, heaps, and graphs, and apply them in real-world problems.
3. Explore algorithmic design paradigms including divide-and-conquer, greedy, and dynamic programming techniques.
4. Solve complex computational problems using backtracking and branch-and-bound strategies.
5. Introduce the concept of NP-completeness and understand the complexity of intractable problems.

Course Outcomes:

At the end of the course, the student will be able to

1. Analyze algorithm performance using time and space complexity and apply asymptotic notations.
2. Implement AVL trees, B-trees, heap trees, and graph traversals for efficient data handling.
3. Solve problems using divide-and-conquer, greedy, and dynamic programming techniques.
4. Apply backtracking and branch-and-bound algorithms to solve combinatorial and optimization problems.
5. Understand NP-hard and NP-complete problems and evaluate the computational complexity of algorithms.

Unit 1 Introduction to Algorithms and advanced Data Structures

10

Introduction to Algorithm Analysis, Space and Time Complexity analysis, Asymptotic Notations.

AVL Trees – Creation, Insertion, Deletion operations and Applications

B-Trees – Creation, Insertion, Deletion operations and Applications

Unit 2 Advanced Data Structures and Divide and Conquer

10

Heap Trees (Priority Queues) – Min and Max Heaps, Operations and Applications

Graphs – Terminology, Representations, Basic Search and Traversals, Connected Components and Biconnected Components, applications

Divide and Conquer: The General Method, Quick Sort, Merge Sort, Strassen's matrix multiplication, Convex Hull

10

Unit 3 Greedy Method and Dynamic Programming

Greedy Method: General Method, Job Sequencing with deadlines, Knapsack Problem, Minimum cost spanning trees, Single Source Shortest Paths.

Dynamic Programming: General Method, All pairs shortest paths, Single Source Shortest Paths– General Weights (Bellman Ford Algorithm), Optimal Binary Search Trees, 0/1 Knapsack, String Editing, Travelling Salesperson problem

Unit 4 Backtracking & Branch and Bound**10**

Backtracking: General Method, 8-Queens Problem, Sum of Subsets problem, Graph Coloring, 0/1 Knapsack Problem

Branch and Bound: The General Method, 0/1 Knapsack Problem, Travelling Salesperson problem

Unit 5 NP Hard and NP Complete Problems**10**

NP Hard and NP Complete Problems: Basic Concepts, Cook's theorem.

NP Hard Graph Problems: Clique Decision Problem (CDP), Chromatic Number Decision Problem (CNDP), Traveling Salesperson Decision Problem (TSP)

NP Hard Scheduling Problems: Scheduling Identical Processors, Job Shop Scheduling

Course Objectives:

This course will be able to

1. Understand the history, evolution, and core principles of Java and object-oriented programming.
2. Learn the use of data types, control structures, classes, objects, methods, and constructors.
3. Implement inheritance, access control, interfaces, and exception handling in Java applications.
4. Explore multithreading, generics, and synchronization for developing concurrent applications.
5. Apply lambda expressions and utilize the Java Collections Framework for efficient data handling.

Course Outcomes:

At the end of the course, the student will be able to

1. Use Java data types, operators, control structures, and arrays to write structured programs.
2. Design and implement classes, methods, constructors, and object-oriented features in Java.
3. Apply inheritance, access control, and exception handling to build robust Java applications.
4. Develop multithreaded programs and use generics for type-safe and reusable code.
5. Implement lambda expressions and work with the Java Collections Framework to manage data efficiently.

Unit 1 Introduction to Java Programming

10

The History and Evolution of Java, Magic: The Byte code, The Java Buzzwords, The Evolution of Java, Java SE 8. Object-Oriented Programming -Two Paradigms, Abstraction, The three OOP Principles, A First Simple Program-Entering the Program, Compiling the Program, Running the Program, Overview of Java, Data Types, Variables, Arrays, operators and control statements. Classes and Objects: Class Fundamentals, Declaration of Objects, Assigning Object Reference Variables, Introducing Methods, Adding a Method to the Class, Returning a Value, Adding a Method That Takes Parameters, Constructors, Parameterized Constructors, The this Keyword, Instance Variable Hiding, Garbage Collection, The finalize() Method, Overloading Methods, Overloading Constructors, Using Objects as Parameters, A Closer Look at Argument Passing, Returning Objects, Recursion.

Unit 2 Access Controls and Inheritance

10

Introducing Access Control: Understanding static, Introducing final, Arrays Revisited, Introducing Nested and Inner Classes, Exploring the String Class.

Inheritance: Inheritance Basics, Member Access and Inheritance, A Practical Example, Accessing super class members, Usage super key word, Creating a Multilevel Hierarchy, Accessing Constructors in inheritance, Method Overriding, Dynamic Method Dispatch, Abstract Classes, Using final with Inheritance. Object Class.

Unit 3 Packages, Interfaces and Exception Handling**10**

Packages and Interfaces: Packages, Defining a Package, Finding Packages and CLASSPATH, A Short Package Example, Access Protection, an Access Example, Importing Packages.

Interfaces: Defining an Interface, Implementing Interfaces, Nested Interfaces, Applying Interfaces, Variables in Interfaces, Interfaces Can Be Extended, Default Interface Methods, Default Method Fundamentals, A More Practical Example, Multiple Inheritance Issues, Use static Methods in an Interface, Final Thoughts on Packages and Interfaces.

Exception Handling: Exception-Handling Fundamentals, Exception Types, Uncaught Exceptions, Using try and catch, Displaying a Description of an Exception, Multiple catch Clauses, Nested try Statements, throw, throws, finally, Built-in Exceptions, Creating Your Own Exception Subclasses.

Unit 4 Multithreaded Programming and Generics**10**

Multithreaded Programming: The Java Thread Model, Thread Priorities, Synchronization, Messaging, The Thread Class and the Runnable Interface, The Main Thread, Creating a Thread, Implementing Runnable, Extending Thread, Choosing an Approach, Creating Multiple Threads, Using `isAlive()` and `join()`, Thread Priorities, Synchronization Using Synchronized Methods, The synchronized Statement, Inter thread Communication.

Generics: What Are Generics, Generics Work Only with Reference Types, A Generic Class with Two Type Parameters, The General Form of a Generic Class, Bounded Types, Using Wildcard Arguments, Bounded Wildcards Creating a Generic Method, Generic Constructors, Generic Interfaces, Raw, Generic Class Hierarchies, Using a Generic super class, A Generic Subclass, Run-Time Type Comparisons Within a Generic Hierarchy, Casting, Overriding Methods in a Generic Class, Type Inference with Generics.

Unit 5 Lambda Expressions and The Collection of Framework**10**

Lambda Expressions: Introducing Lambda Expressions, Lambda Expression Fundamentals, Functional Interfaces, Some Lambda Expression Examples, Block Lambda Expressions, Generic Functional Interfaces, Passing Lambda Expressions as Arguments, Lambda Expressions and Variable Capture.

java.util Package: The Collections Framework: Collections Overview, The Collection Interfaces: The Collection Interface, The List Interface; The Collection Classes: The ArrayList Class, The LinkedList Class, Accessing a Collection via an Iterator, Using an Iterator, The For-Each Alternative to Iterators, Storing User-Defined Classes in Collections, Working with Maps, The Map Interfaces, The Map Classes, The Collection Algorithms. Arrays, StringTokenizer.

Course Objectives:

This course will be able to

1. Introduce data representation techniques and the basic structure of computers.
2. Develop understanding of digital logic circuits, simplification techniques, and their applications.
3. To understand computer arithmetic operations and how they are implemented using hardware algorithms.
4. To provide insights into memory hierarchy, storage devices, and performance considerations.
5. Introduce input/output systems, interrupt mechanisms, and standard I/O interfaces.

Course Outcomes:

At the end of the course, the student will be able to

1. Represent data using different number systems and understand basic computer architecture.
2. Design, simplify, and Analyse both combinational and sequential digital logic circuits.
3. Perform fixed and floating-point arithmetic operations and understand processor execution cycles.
4. Analyse memory systems, including cache and virtual memory, and evaluate their performance.
5. Explain I/O operations, manage hardware interrupts, and describe standard interface mechanisms

Unit 1 Data Representation and Basic Structure of Computer 10

Data Representation: Number base conversions, Octal and Hexadecimal Numbers, Signed binary numbers, Binary Numbers, Fixed Point Representation. Floating Point Representation, Binary codes

Basic Structure of Computers: Computer Types, Computer Generations, Functional units, Basic operational concepts, Bus structures.

Unit 2 Digital Logic Circuits 10

DIGITAL LOGIC CIRCUITS - I: Basic Logic Functions, Logic gates, universal logic gates, Minimization of Logic expressions, K-Map Simplification, Combinational Circuits.

DIGITAL LOGIC CIRCUITS - II: Flip-Flops, Registers, Shift Registers, Binary counters, Decoders, Multiplexers.

Unit 3 Computer Arithmetic and Process Organization 10

Computer Arithmetic: Algorithms for fixed point and floating point addition, subtraction, multiplication and division operations.

Processor Organization: Introduction to CPU, Execution of a Complete Instruction, Multiple-Bus Organization, Hardwired Control and Multi programmed Control.

Unit 4 The Memory Organization 10

The Memory Organization: Basic Concepts, RAM Memories, Read-Only Memories, Speed, Size and Cost, Cache Memories, Performance Considerations, Virtual Memories, Memory Management Requirements, Secondary Storage.

Unit 5 Input/ Output Organization**10**

Input /Output Organization: Introduction to I/O, Interrupts- Hardware, Enabling and disabling Interrupts, Device Control, Direct memory access, buses, Interface Circuits, Standard I/O Interfaces.

Prescribed Textbooks:

1. Computer Organization, Carl Hamacher, Zvonko Vranesic, Safwat Zaky, 6th edition, McGraw Hill.
2. Digital Design, 6th Edition, M. Morris Mano, Pearson Education.

ANNAMACHARYA UNIVERSITY

(ESTD UNDER AP PRIVATE UNIVERSITIES (ESTABLISHMENT AND REGULATION) ACT, 2016)

(UNIVERSITY LISTED IN UGC AS PER THE SECTION 2(f) OF THE UGC ACT, 1956)

RAJAMPET, Annamayya District, AP – 516126, INDIA

Title of the Course	:	Advanced Data Structures and Algorithm Analysis Lab
Category	:	PC
Year	:	II
Semester	:	I
Course Code	:	24ACSE31L
Branch/es	:	CSE,AI&DS, CSE(AI), CSE(DS), AI&ML, CSE(AIML), CSE(ICB)

Lecture Hours

0

Tutorial Hours

0

Practice Hours

3

Credits

1.5

Course Objectives:

This course will be able to

1. Acquire practical skills in constructing and managing Data structures.
2. Use the Java SDK environment to create, debug and run simple Java Programs.

Course Outcomes:

At the end of the course, the student will be able to

1. Design and develop programs to solve real world problems with the popular algorithm design methods.
2. Demonstrate an understanding of Non-Linear data structures by developing implementing the operations on AVL Trees, B-Trees, Heaps and Graphs.
3. Critically assess the design choices and implementation strategies of algorithms and data structures in complex applications.
4. Utilize appropriate data structures and algorithms to optimize solutions for specific computational problems.
5. Compare the performance of different of algorithm design strategies.

3

Exercise 1

Construct an AVL tree for a given set of elements which are stored in a file. And implement insert and delete operation on the constructed tree. Write contents of tree into a new file using in-order.

Exercise 2

3

Construct B-Tree an order of 5 with a set of 100 random elements stored in array. Implement searching, insertion and deletion operations.

3

Exercise 3

Construct Min and Max Heap using arrays, delete any element and display the content of the Heap.

Exercise 4

3

Implement BFT and DFT for given graph, when graph is represented by

- a) Adjacency Matrix b) Adjacency Lists

Exercise 5

3

Write a program for finding the bi-connected components in a given graph.

Exercise 6

3

Implement Quick sort and Merge sort and observe the execution time for various input sizes (Average, Worst and Best cases).

- Exercise 7** **3**
Compare the performance of Single Source Shortest Paths using Greedy method when the graph is represented by adjacency matrix and adjacency lists.
- Exercise 8** **3**
Implement Job Sequencing with deadlines using Greedy strategy.
- Exercise 9** **3**
Write a program to solve 0/1 Knapsack problem Using Dynamic Programming.
- Exercise 10** **3**
Implement N-Queens Problem Using Backtracking.
- Exercise 11** **3**
Use Backtracking strategy to solve 0/1 Knapsack problem.
- Exercise 12** **3**
Implement Travelling Sales Person problem using Branch and Bound approach.

ANNAMACHARYA UNIVERSITY

(ESTD UNDER AP PRIVATE UNIVERSITIES (ESTABLISHMENT AND REGULATION) ACT, 2016)

(UNIVERSITY LISTED IN UGC AS PER THE SECTION 2(f) OF THE UGC ACT, 1956)

RAJAMPET, Annamayya District, AP – 516126, INDIA

Title of the Course:	Object Oriented Programming Using Java Lab
Category	: PC
Year	: II
Semester	: I
Course Code	: 24ACSE32L
Branch/es	: CSE, AI&DS, CSE(AI), CSE(DS), AI&ML, CSE(AIML), CSE(ICB)

Lecture Hours	Tutorial Hours	Practice Hours	Credits
0	0	3	1.5

Course Objectives:

This course will be able to

1. Understand fundamentals of programming such as variables, conditional and iterative execution, methods.
2. Understand fundamentals of Object-Oriented Programming in Java, Including defining classes, Invoking methods, using libraries.
3. Aware of the important topics and principles of software development.
4. Have the ability to write a computer program to solve specified problems.
5. Use the Java SDK environment to create, debug and run simple Java Programs.

Course Outcomes:

At the end of the course, the student will be able to

1. Design and implement the programs to demonstrate classes, objects and encapsulation.
2. Demonstrate and implement the principles of inheritance, polymorphism, constructor overloading, and method overloading.
3. Understanding the use of packages, creation of packages, importing the packages and the importance of the collection of framework.
4. Implementation of multithread programming, Thread Priority, Exception Handling and Creation of own Exceptions.
5. Implement and demonstrate generic programming, lambda expressions and collection of framework.

Exercise 1

3

- a) Write a program using classes and objects in java?
- b) Write a Java program to calculate sum of 5 subjects and find percentage.
- c) Write a Java program to convert temperature from Centigrade to Fahrenheit and Fahrenheit to Centigrade
- d) Write a Java program to perform the arithmetic operations using switch case statement

Exercise 2

3

- a) Write a Java program to display all strong numbers between 1 to n.
- b) Write a Java program to display Fibonacci series between 1 to n.

- c) Write a Java program to find the factorial of a given number using recursion.
- d) Write a Java program to find multiplication of two matrices.
- e) Write a program to accept contents into an Integer Array and print the frequency of each number in the order of their number of occurrences.

Exercise 3

3

- a) Write a Java program to implement the access control.
- b) Write a Java program to implement the method overloading.
- c) Write a program to call default constructor first and then any other constructor in the class?
- d) Create a class Box that uses a parameterized constructor to initialize the dimensions of a box. The dimensions of the Box are width, height, depth. The class should have a method that can return the volume of the box. Create an object of the Box class and test the functionalities.
- e) Create a new class called Calculator with the following methods:
A static method called powerInt(int num1,int num2) This method should return num1 to the power num2.
A static method called powerDouble(double num1,double num2). This method should return num1 to the power num2. Invoke both the methods and test the functionality. Also count the number of objects created

Exercise 4

3

- a) Write a Java program to implement the method overriding.
- b) Create a multilevel inheritance for classes vehicle, brand and cost. The vehicle class determines the type of vehicle which is inherited by the class brand which determines the brand of the vehicle. Brand class is inherited by cost class, which tells about the cost of the vehicle. Create another class which calls the constructor of cost class and method that displays the total vehicle information from the attributes available in the super classes.
- c) Create an inheritance hierarchy of Figure_3D, Cylinder, Cone, Sphere etc. In the base class provides methods that are common to all Figure_3Ds and override these in the derived classes to perform different behaviors, depending on the specific type of Figure_3D. Create an array of Figure_3D, fill it with different specific types of Figure_3Ds and call your base class methods

Exercise 5

3

- a) Design a package to contain the class Student that contains data members such as name, roll number and another package contains the interface Sports which contains some sports information. Import these two packages in a package called Report which process both Student and Sport and give the report.
- b) Write a Java program to implement the multiple inheritance using interfaces.

Exercise 6

3

- a) Write a Java program to find whether the given string is palindrome or not.
- b) Accept two strings from the user and determine if the strings are anagrams or not.
- c) Accept an array of strings and display the number of vowels and consonants occurred in each string.
- d) Accept a String and a number n from user. Divide the given string into substrings each of size n and sort them lexicographically.

Exercise 7**3**

- a) Write a program that reads two numbers from the user to perform integer division into Num1 and Num2 variables. The division of Num1 and Num2 is displayed if they are integers. If Num1 or Num2 were not an integer, the program would throw a Number Format Exception. If Num2 were Zero, the program would throw an Arithmetic Exception
- b) Write a Java program to implement the nested try statement.
- c) Write a Java program to implement the own exception class.

Exercise 8**3**

- a) Write a Java program for multi-thread implementation.
Note: First thread displays "Good Morning" every one second, the second thread displays "Hello" every two seconds and the third thread displays "Welcome" every three seconds.
- b) Write a Java program to use the is Alive() and join() methods.
- c) Write a program to illustrate Thread synchronization.
- d) Write a Java program to implement producer consumer problem using inter-thread communication mechanism.

Exercise 9**3**

- a) Create a generic Stack class that can hold any type of object. Implement the following methods: i) void push(T obj): pushes an object onto the top of the stack, ii) T pop(): removes and returns the object at the top of the stack iii) boolean is Empty(): returns true if the stack is empty, false otherwise
- b) Create a generic class for sorting the elements of different data types.
- c) Any two programs on Lambda expressions.

Exercise 10**3**

- a) Write a Java program to display the sum of all the integers of given line of integers using StringTokenizer class.
- b) Write a Java program to demonstrate the working of LinkedList collection class.
- c) Write a Java program to create a Priority Queue and add some elements to it. Then remove the highest priority element from the Priority Queue and print the remaining elements

Course Objectives:

This course will be able to

1. Understand the basics of logic gates.
2. Know basic combinational circuits and verify their functionalities.
3. Apply the design procedures to design basic sequential circuits.
4. Learn about counters and Shift Registers.
5. Understand the basic digital circuits and to verify their operation.

Course Outcomes:

At the end of the course, the student will be able to

1. Develop Boolean equations and truth tables for synthesis using different logic gates.
2. Design combinational and sequential logic circuits.
3. Develop various shift registers and Counters.
4. Design and construct synchronous, asynchronous counters and special type of counters.
5. Design and construct ALU, CPU and Memory.

Exercise 1

3

To verify the truth table of basic logic gates AND, OR, NOT, NAND, NOR, XOR, XNOR and their realization using universal logic gates

Exercise 2

3

- a) To realize Half adder, Full adder, Half Subtractor and Full Subtractor using logic gates.
- b) To realize Half Adder, Full adder, Half subtractor and Full subtractor using NAND gate

Exercise 3

3

- a) To implement 2-to-4 Decoder and 3-to-8 Decoder using logic gates.
- b) To implement Full adder using 3-to-8 Decoder.

Exercise 4

3

- a) To implement 2-to-1, 4 to 1, 8 to 1 multiplexer using logic gates.
- b) To implement Full adder using 4 to 1 multiplexer

Exercise 5

3

To Realize and verify the truth table of SR, JK, D and T flip flop.

Exercise 6

3

Create a 4-bit ripple carry adder circuit using half adders and full adders and test it by giving proper input.

Exercise 7

3

Design a 5-bit Shift Registers using the flip-flops and check the output

Exercise 8

3

Create a combinational multiplier circuit to multiply two 4-bit binary numbers. Use half adders, full adders and logic gates and test it by giving proper input.

Exercise 9 **3**

- a) Design a 4-bit Booth's multiplier circuit
 b) Design a 4-bit ALU comprising only the AND, OR, XOR and Add operations.

Exercise 10 **3**

Design a 4X3 RAM memory which will have 4 words each of 3 bits using binary RAM cells, decoder with enable, OR gates and test it by giving proper input.

Exercise 11 **3**

- a) Design a CPU with single instruction
 b) Design a CPU with more instructions

Exercise 12 **3**

To understand the Karnaugh Maps.

Course Objectives:

This course will be able to

1. Interpret and use HTML concepts in developing the web pages
2. Use the tables and forms controls to design web pages.
3. Use the CSS to design web pages.
4. Interpret the JavaScript programming language.
5. Use JavaScript DOM concepts to create dynamic webpages.

Course Outcomes:

At the end of the course, the student will be able to

1. Interpret and apply the fundamental HTML mark-ups when designing web pages.
2. Apply and design the web pages with Tables and forms controls.
3. Implement cascading style sheets to design web pages.
4. Interpret and use JavaScript concepts in designing web pages.
5. Implement JavaScript DOM concepts to create dynamic webpages.

Unit 1 Introduction to HTML 10

Structuring Documents for the Web-A Web of Structured Documents, Introducing HTML, Tags and Elements, Attribute Groups: Core Attributes, Internationalization, Core Elements, Basic Text Formatting, Understanding Block and Inline Elements, Grouping Content, Text Processing tags, working with lists: ordered, unordered, Nested lists.

Links and Navigation :Basic Links, Creating In-Page Links with the Element

Unit 2 Design of Webpages 10

Images: adding images, using images as links. Audio and video: adding audio and video to your webpages.

Tables: Introducing Tables, Basic Table Elements and Attributes, adding a Caption to a Table, Grouping Sections of a Table, Nested Tables.

Forms: Introducing Forms, creating a Form with the Top of Form Element, Form Controls, and Creating Labels for Controls and the Element, Structuring Your Forms with field set and legend Elements, Focus, Disabled and Read-Only Controls.

Unit 3 Design of Webpages using CSS 10

Working with Frames: frame and frameset elements.

Cascading Style Sheets: Introducing CSS, CSS Properties: Controlling Text, Text Formatting, and Text Pseudo-Classes. Styling Text: Selectors-universal, ID, class, Child, Descendant, Adjacent sibling, general sibling. Lengths, Introducing the Box Model: An Example Illustrating the Box Model.

More CSS: Backgrounds, Lists, Tables.

Unit 4 Introduction to Java Script**10**

JavaScript: Introduction to JavaScript, How to Add a Script to Your Pages, comments in JavaScript, Create an External JavaScript, Input and Output in JavaScript. JavaScript Programming console, General Programming Concepts: Variables, Operators, String Operators (Using + with Strings), Functions, Conditional Statements, Loops.

Unit 5 Java Script DOM**10**

JavaScript pre-defined object properties and methods: Document, Window, Array, Math, String, Regex. Document object model: DOM tree, Accessing elements: Class, id, Tagname. Update Text content Using text Content, Inner Text and Inner HTML property. Adding an Element to the DOM Tree, Removing an element from the DOM Tree.

Branch/es	:	CSE, AI&DS, CSE(AI), CSE(DS), AI&ML, CSE(AIML), CSE(ICB)

Lecture Hours	Tutorial Hours	Practice Hours	Credits
3	0	0	3

Course Objectives:

This course will be able to

1. Introduce the fundamental concepts and architecture of database systems and the basics of SQL.
2. Understand database design using the Entity-Relationship (ER) model and its mapping to relational models.
3. Develop skills in writing SQL and PL/SQL queries, including functions, procedures, and triggers.
4. Understand normalization techniques and schema refinement for maintaining data integrity and reducing redundancy.
5. Learn transaction management concepts and concurrency control mechanisms in database systems.

Course Outcomes:

At the end of the course, the student will be able to

1. Explain the basic structure, components, and applications of database systems and perform basic SQL operations.
2. Design conceptual data models using ER diagrams and convert them into relational schemas.
3. Write complex SQL and PL/SQL queries including joins, views, sub queries, triggers, and cursors.
4. Apply normalization techniques and functional dependency concepts to design efficient and consistent database schemas.
5. Understand and implement transaction properties, concurrency control, and recovery mechanisms in DBMS.

Unit 1 Introduction to DBMS and Basics of SQL 10

INTRODUCTION: Database-System Applications, Characteristics, Purpose of Database Systems, View of Data, Database Languages, Data Storage and Querying, Transaction Management, Data Base Architecture, Database Users and Administrators.

Basic SQL: Simple Database Schema ,data types, table definitions(create, alter),different DML operations(insert, delete, update)

Unit 2 Database Design 10

DATABASE DESIGN: Database Design and ER Diagrams, Entities, Attributes and Entity Sets, Relationships and Relationship Sets, Additional Features of the ER Model, Conceptual Design with the ER Model, Case study: The Internet Shop. The Relational Model: Introduction to the Relational Model, Integrity Constraints over Relations, Enforcing Integrity Constraints, Querying Relational Data, Logical Data Base Design: ER to Relational.

Unit 3 SQL and PL/SQL**10**

SQL AND PL/SQL: Introduction to SQL, Data Definition Commands, Data Manipulation Commands, Basic SQL Querying(Select and project) Select Queries, Virtual Tables: Creating View, Altering View, Updating View, Destroying View, Relational Set Operators, SQL Join Operators, Sub Queries and Correlated Queries, implementation of different integrity constraints, Aggregate Functions, Procedural SQL: Stored Procedures, Stored Functions, Triggers, Cursors

Unit 4 Introduction to schema Refinement**10**

Introduction to Schema Refinement: Purpose of Normalization or Schema refinement Problems Caused by Redundancy, Decompositions, Problems Related to Decomposition, Functional Dependencies, Reasoning about FDs, Normal Forms: 1NF, 2NF, 3NF, BCNF, Properties of Decomposition: Lossless Join Decomposition, Dependency Preserving Decomposition, Multivalued Dependencies, 4 NF.

Unit 5 Transactions and concurrency control**10**

ACID Properties: Consistency and Isolation, Atomicity and Durability, Transactions and Schedules, Serializability, Recoverability, Testing for serializability, Concurrent Execution of Transactions, Lock-Based Concurrency Control, Performance of Locking, Transaction Support in SQL. Deadlocks, Recovery and Atomicity.

Course Objectives:

This course will be able to

1. Understand the evolution of software engineering and various software development life cycle models.
2. Impart knowledge on software project management, including estimation techniques, risk management, and requirement analysis.
3. Study software design principles, including modularity, cohesion, coupling, and interface design.
4. Learn coding standards, testing strategies, software quality assurance, and reliability techniques.
5. Explore software maintenance, CASE tools, and software reuse concepts and methodologies.

Course Outcomes:

At the end of the course, the student will be able to

1. Explain the software development life cycle models and identify suitable models for different software projects.
2. Analyze and document software requirements using specification techniques and apply estimation models like COCOMO.
3. Design function-oriented and user-friendly software systems with proper design strategies and user interfaces.
4. Implement coding standards and conduct effective testing to ensure software reliability and quality.
5. Understand the processes of software maintenance, CASE tools, and approaches to software reuse.

Unit 1 Introduction to Software Engineering

10

Introduction: Evolution, Software development projects, Exploratory style of software developments, Emergence of software engineering, Notable changes in software development practices, Computer system engineering.

Software Life Cycle Models: Basic concepts, Waterfall model and its extensions, Rapid application development, Agile development model, Spiral model

Unit 2 Software Requirement Analysis

10

Software Project Management: Software project management complexities, Responsibilities of a software project manager, Metrics for project size estimation, Project estimation techniques, Empirical Estimation techniques, COCOMO, Halstead's software science, risk management.

Requirements Analysis and Specification: Requirements gathering and analysis, Software Requirements Specification (SRS), Formal system specification, Axiomatic specification, Algebraic specification, Executable specification and 4GL

Unit 3 Software Design

10

Software Design: Overview of the design process, how to characterize a good software design? Layered arrangement of modules, Cohesion and Coupling. Approaches to software design.

Agility: Agility and the Cost of Change, Agile Process, Extreme Programming (XP), Other Agile Process Models, Tool Set for the Agile Process (Textbook 2)

Function-Oriented Software Design: Overview of SA/SD methodology, Structured analysis, Developing the DFD model of a system, Structured design, Detailed design, and Design Review.

User Interface Design: Characteristics of a good user interface, Basic concepts, Types of user interfaces, Fundamentals of component-based GUI development, and user interface design methodology.

Unit 4 Software Coding and Testing

10

Coding And Testing: Coding, Code review, Software documentation, Testing, Black-box testing, White-Box testing, Debugging, Program analysis tools, Integration testing, testing object-oriented programs, Smoke testing, and some general issues associated with testing.

Software Reliability and Quality Management: Software Reliability. Statistical testing, Software quality, Software quality management system, ISO 9000. SEI Capability maturity model. Few other important quality standards, and Six Sigma.

Unit 5 Software Maintenance

10

Computer-Aided Software Engineering (Case): CASE and its scope, CASE environment, CASE support in the software life cycle, other characteristics of CASE tools, Towards second generation CASE Tool, and Architecture of a CASE Environment.

Software Maintenance: Characteristics of software maintenance, Software reverse engineering, and Software maintenance process models and Estimation of maintenance cost.

Software Reuse: reuse- definition, introduction, reason behind no reuse so far, Basic issues in any reuse program, A reuse approach, and Reuse at organization level.

Course Objectives: This course will be able to

1. Study the concepts of Artificial Intelligence.
2. Learn the methods of solving problems using Artificial Intelligence.
3. Introduce the concepts of Expert Systems.
4. Understand the applications of AI, namely game playing, theorem proving, and machine learning.
5. Learn different knowledge representation techniques.

Course Outcomes:

At the end of the course, the student will be able to

1. Understand the importance of artificial Intelligence in real world environment.
2. Apply the artificial intelligence algorithms for problem solving.
3. Analyse the various reasoning and knowledge representation techniques.
4. Solve the problems using classification and planning techniques.
5. Learn about Expert system techniques in uncertain environment for obtaining solution.

Unit 1 Introduction

10

AI problems, foundation of AI and history of AI intelligent agents: Agents and Environments, the concept of rationality, the nature of environments, structure of agents, problem solving agents, problem formulation.

Unit 2 Searching

10

Searching for solutions, uniformed search strategies – Breadth first search, depth first Search. Search with partial information (Heuristic search) Hill climbing, A* ,AO* Algorithms, Problem reduction, Game Playing- Adversial search, Games, mini-max algorithm, optimal decisions in multiplayer games, Problem in Game playing, Alpha-Beta pruning, Evaluation functions.

Unit 3 Representation of Knowledge

10

Knowledge representation issues, predicate logic- logic programming, semantic nets- frames and inheritance, constraint propagation, representing knowledge using rules, rules based deduction systems. Reasoning under uncertainty, review of probability, Bayes' probabilistic interferences and dempster shafer theory.

Unit 4 Logic concepts

10

First order logic. Inference in first order logic, propositional vs. first order inference, unification & lifts forward chaining, Backward chaining, Resolution, Learning from observation Inductive learning, Decision trees, Explanation based learning, Statistical Learning methods, Reinforcement Learning.

Unit 5 Expert Systems**10**

Architecture of expert systems, Roles of expert systems – Knowledge Acquisition Meta knowledge Heuristics. Typical expert systems – MYCIN, DART, XCON: Expert systems shells.

Course Objectives:

The course aims to build a strong foundation in probability and statistics for modeling and analyzing data under uncertainty. It covers probability theorems, random variables, distributions, correlation, estimation, and hypothesis testing for large and small samples. Students will gain the ability to apply statistical tools in data analysis, research, and engineering problem-solving.

Course Outcomes:

At the end of the course, the student will be able to

1. Apply the concepts of probability theorems in stochastic process.
2. Apply the probability distribution in real life problems.
3. Calculate the correlation between two variables.
4. Evaluate the hypotheses of large samples.
5. Evaluate the hypotheses of small samples.

Unit 1 Probability

10

Probability - axioms of probability – addition theorem of probability - conditional probability-multiplication theorem of probability (without proof) - Baye's theorem.

Random variables - discrete and continuous - Distribution functions - Mean and Variance.

Unit 2 Probability distributions

8

Probability distributions – Binomial and Poisson distribution - fitting - normal distribution - their properties.

Unit 3 Introduction of statistics

8

Introduction of Statistics – Mean - Median and Mode for ungrouped and grouped data.

Correlation - correlation coefficient : Karl Pearson's coefficient - Spearman's rank correlation

Unit 4 Estimation and Testing of hypothesis for large samples

10

Estimation - Point estimation - Interval estimation of one mean (small and large) - one Proportion (large).

Test of Hypothesis: Types of errors, one and two tailed tests, level of significance, single mean -difference of means - single proportion - difference of proportions (large).

Unit 5 Testing of hypothesis for small samples

8

Student t-distribution test for single mean - two means and paired t-test,

Testing of equality of variances (F-test) - χ^2 test for goodness of fit - χ^2 test for independence of attributes.

Course Objectives:

The course aims to provide a comprehensive understanding of the basic concepts of Management and various Organizational Structures, along with their types, merits, and demerits. It emphasizes the importance of comprehending the key functions of Human Resource Management (HRM) while also enabling students to develop an idea about Operations Management and Project Management. Furthermore, it seeks to build a foundation in the essential areas of Financial Management and Marketing Management. In addition, the course covers the fundamental concepts of Total Quality Management (TQM), Supply Chain Management (SCM), Business Ethics, and Management Information Systems (MIS), offering learners a holistic perspective on management practices.

Course Outcomes:

At the end of the course, the student will be able to

1. Summarize the basic concepts of management and organization structures.
2. Analyze the different human resource management process.
3. Apply the concepts of PERT, CPM to find the critical path for project success.
4. Apply different financial and marketing strategies in the organization.
5. Comprehend the different concepts of TQM, SCM, Ethics, and MIS & ERP in an organization.

Unit 1 Management and Organization Structure 12

Meaning, Nature, Concept and Importance of Management, Functions of Management, Evolution of Management Thought: Taylor Scientific Management, Fayol's Administrative Management, Systems Approach. Roles and Skills of Manager, Principles and Need of Organization Structure, Forms of Organization Structure: Line, Line and Staff, Functional, Divisional and Matrix Organizations.

Unit 2 Human Resources Management (HRM) 12

Definition, Significance of HRM, Functions of HRM, HR Planning Process, Job Analysis, Job Design, Recruitment and Selection, Placement, Induction and Training, Performance Appraisal, Compensation, Industrial Relations.

Unit 3 Operations Management and Project Management 12

Introduction and Functions of Operations, Plant Location and Layout, Methods of Production (Job, Batch and Mass Production), Objectives of Inventory Management, Need for Inventory Control, Method of Inventory Management: EOQ, ABC Analysis. Programme Evaluation and Review Technique (PERT), Critical Path Method (CPM).

Unit 4 Financial Management and Marketing Management 12

Objectives, Scope, Techniques of Investment Analysis, Pay Back Period, Accounting Rate of Return, and Working Capital, Cost of Capital, Sources of Financing, Definitions of Marketing, Core Concepts of Marketing, Marketing Mix, Product Levels – Product Life Cycle, Pricing Objectives, Pricing Methods

Unit 5 Advances in Management Practices**12**

Definitions of quality, Basic concepts of TQM, TQM framework, Principles of Total Quality Management (TQM), Definitions of Supply Chain Management, Decision Phases in Supply Chain, Transportation Services, Overview Of Ethics, Nature and Objectives of Ethics, Relationship Between Ethics and Organization, Basic Concepts and Overview of Management Information System (MIS), Enterprise Resource Planning (ERP).

Prescribed Textbooks:

Title of the Course	:	Database Management Systems Lab
Category	:	PC
Year	:	II
Semester	:	II
Course Code	:	24ACSE41L
Branch/es	:	CSE, AI&DS, CSE(AI), CSE(DS), AI&ML, CSE(AIML), CSE(ICB)

Lecture Hours	Tutorial Hours	Practice Hours	Credits
0	0	3	1.5

Course Objectives:

This course will be able to

1. Populate and query a database using SQL DDL/DML Commands.
2. Declare and enforce integrity constraints on a database.
3. Writing Queries using advanced concepts of SQL.
4. Programming PL/SQL including procedures, functions, cursors and triggers.

Course Outcomes:

At the end of the course, the student will be able to

1. Understand and apply SQL commands for creating, altering, and managing database tables and constraints.
2. Construct complex SQL queries using various conditions, aggregate functions, and sub queries.
3. Develop PL/SQL programs utilizing control structures, exception handling, and transaction management.
4. Implement stored procedures, functions, and triggers to enhance database operations and integrity.
5. Create Java applications that connect to databases using JDBC for data manipulation and retrieval.

Exercise 1

3

Draw Relational Databases and ER Diagrams for the following applications.

- a) Student Information System, Student(Student No, Student Name, Address, Mobile No, Email ID, Institute Name, Branch Name, Fee, Mark1, Mark2, Mark3, Mark4, Mark5, TotalMarks, Percentage, Grade)
- b) Employee Information System, Employee (Employee ID, Employee Name, Address, Mobile No, Email ID, Organization Name, Employee Designation, Basic Salary, DA, HRA, Gross Salary, Deductions, Net Salary)

Exercise 2

3

Creation, altering and dropping of tables and inserting rows into a table (use constraints while creating tables) examples using SELECT command

Exercise 3

3

Queries (along with sub-Queries) using ANY, ALL, IN, EXISTS, NOT EXISTS, UNION, INTERSECT, Constraints. Example: - Select the roll number and name of the student who secured fourth rank in the class

Exercise 4

3

Queries using Aggregate functions (COUNT, SUM, AVG, MAX and MIN), GROUP BY, HAVING and Creation and dropping of Views.

- Exercise 5** **3**
Write SQL queries to perform JOIN OPERATIONS (i.e. CONDITIONAL JOIN, EQUI JOIN, LEFT OUTER JOIN, RIGHT OUTER JOIN, FULL OUTER JOIN)
- Exercise 6** **3**
Queries using Conversion functions (to_char, to number and to date), string functions (Concatenation, lpad, rpad, ltrim, rtrim, lower, upper, initcap, length, substr and instr), date functions (Sys date, next day, add months, last day, months between, least, greatest, trunc, round, to_char, to date)
- Exercise 7** **3**
a) Create a simple PL/SQL program which includes declaration section, executable section and exception – Handling section (Ex. Student marks can be selected from the table and printed for those who secured first class and an exception can be raised if no records were found)
b) Insert data into student table and use COMMIT, ROLLBACK and SAVEPOINT in PL/SQL block
- Exercise 8** **3**
Develop a program that includes the features NESTED IF, CASE and CASE expression. The program can be extended using the NULLIF and COALESCE functions
- Exercise 9** **3**
a) Write SQL queries to perform KEY CONSTRAINTS (i.e. primary key, foreign key, unique not null, check, default).
b) Programs development using creation of procedures, passing parameters IN and OUT of PROCEDURES.
c) Program development using creation of stored functions, invoke functions in SQL Statements and write complex functions.
- Exercise 10** **3**
a) Develop programs using features parameters in a CURSOR, FOR UPDATE CURSOR, WHERE CURRENT of clause and CURSOR variables
b) Develop Programs using BEFORE and AFTER Triggers, Row and Statement Triggers and INSTEAD OF Triggers
- Exercise 11** **3**
Create a table and perform the search operation on table using indexing and non-indexing techniques
- Exercise 12** **3**
a) Write a Java program that connects to a database using JDBC
b) Write a Java program to connect to a database using JDBC and insert values into it
c) Write a Java program to connect to a database using JDBC and delete values from it.

Title of the Course:	Software Engineering Lab
Category	: PC
Year	: II
Semester	: II
Course Code	: 24ACSE42L
Branch/es	: CSE, AI&DS, CSE(AI), CSE(DS), AI&ML, CSE(AIML), CSE(ICB)

Lecture Hours	Tutorial Hours	Practice Hours	Credits
0	0	3	1.5

Course Objectives:

This course will be able

1. To familiarize students with software engineering processes, tools, and techniques through hands-on implementation.
2. To develop the ability to gather requirements and create software requirement specifications (SRS) for real-world applications.
3. To enable students to design system models using Data Flow Diagrams (DFDs) and Unified Modeling Language (UML).
4. To implement test cases and apply software testing techniques like black-box and white-box testing.
5. To promote teamwork, documentation, and presentation skills through mini projects or case studies.

Course Outcomes:

At the end of the course, the student will be able to

1. Prepare Software Requirement Specifications (SRS) and functional models for given problems.
2. Design and document software using tools such as DFDs, UML diagrams, and design notations.
3. Implement and validate software components using software engineering practices and testing strategies.
4. Apply software testing tools and write test cases to ensure software quality and reliability.
5. Demonstrate teamwork.

Exercise 1

3

- a) Define a problem statement.
- b) Preparation of Software Requirement Specification Document, Design Document.

Exercise 2

3

Define the functional and non-functional requirements of the system using use cases and prepare a SRS document also

Exercise 3

3

- a) Identify and analyze all the possible risks and its risk mitigation plan for the system to be automated.
- b) Design and document a use case diagram for a problem statement

Exercise 4

3

Design a use case diagram class diagram and object diagrams using Rational tools for any one application

- Exercise 5** **3**
a) Write C/C++/Java/Python program for classifying the various types of cohesion and coupling.
b) Develop test cases for unit testing and integration testing **3**
- Exercise 6**
Schedule all the activities and sub-activities Using the PERT/CPM charts
- Exercise 7** **3**
Define an appropriate metrics for at least 3 quality attributes for any software application

Case study-1 **A POINT OF SALE (POS) SYSTEM** **6**
Problem Statement: A POS System is a computerized application used to record sales and handle payments; it is typically used in a retail store. It includes hardware components such as a computer and bar code scanner, and software to run the system. It interfaces to various service applications, such as a third-party tax calculator and inventory control. These systems must be relatively fault tolerant; that is, even if remote services and temporarily unavailable they must still be of capturing sales and handling at least cash payments. A POS system must support multiple and varied client – side terminals and interfaces such as browser, PDA's, touch – screens

Case study-2 **A POINT OF SALE (POS) SYSTEM** **6**
Problem Statement: The online auction system is a design about a website where sellers collect and prepare a list of items they want to sell and place it on the website for visualizing. To accomplish this purpose the user has to access the site. Incaseit"s a new user he has to register. Purchaser"s login and select items they want to buy and keep bidding for it. Interacting with the purchasers and sellers through messages does this. There is no need for customer to interact with the sellers because every time the purchasers bid, the details will be updated in the database. The purchaser making the highest bid for an item before the close of the auction is declared as the owner of the item. If the auctioneer or the purchaser doesn't want to bid for the product then there is fixed cutoff price mentioned for every product. He can pay that amount directly and own the product. The purchaser gets a confirmation of his purchase as an acknowledgement from the website. After the transition by going back to the main menu where he can view other items.

Case study-3 **ONLINE AUCTION SALES** **6**
Problem Statement: In the software industry the recruitment procedure is the basic thing that goes in the hand with the requirement as specified by the technical management team. HR first gives an advertisement in leading Newspapers, Journals, Weeklies and Websites. The job seekers can apply for it through by Post or by e-mail to the company. The technical skill and the experience of the candidates are reviewed and the short listed candidates are called for the interview. There may be different rounds for interview like the written test, technical interview, and HR interview. After the successful completion of all rounds of interview, the selected candidates" names are displayed. Meanwhile HR gives all the details about the salary, working hours, terms and conditions and the retirement benefit to the candidate

Case study-4 **ONLINE TICKET RESERVATION FOR RAILWAYS** **6**
Problem Statement: Computer play an integral part of the day in today's life. It makes the entire job easier and faster, every job is computerized so as the ticket reservation we can book over the online ticket reservation system. During the booking of the ticket reservation passenger has to select origin, date of journey, destination, class of train etc. The reservation counter keeps track of passenger's information. Thus the system will have all the details about the trains and facilities provided by them. There are various trains with the different level of convenience for the passengers. The whole database will be maintained by database administrator. There are varieties of trains where the passengers can select the train according to the convenience for their destination journey. The journey could be within the state or across the India. Each train has the three types of classes i.e. Sleeper class, First class and the AC compartment. Design the application for the above problem description

Course Objectives:

This course will be able to

1. Study the concepts of Artificial Intelligence.
2. Learn the methods of solving problems using Artificial Intelligence.
3. Introduce the concepts of Expert Systems and machine learning.

Course Outcomes:

At the end of the course, the student will be able to

1. Understand AI problems, the foundation and history of AI, and the functioning of intelligent agents in various environments.
2. Understand and analyze various search strategies, heuristic methods, and algorithms for game playing and problem reduction.
3. Gain skills in knowledge representation, logic programming, and reasoning under uncertainty using various probabilistic and rule-based methods.
4. Understand and apply logic concepts, inference methods, and various learning techniques including decision trees and reinforcement learning.
5. Understand AI problems, the foundation and history of AI, and the functioning of intelligent agents in various environments.

Exercise 1

3

Pandas Library

- a) Write a python program to implement Pandas Series with labels.
- b) Create a Pandas Series from a dictionary.
- c) Creating a Pandas Data Frame.
- d) Write a program which makes use of the following Pandas methods
i) describe () ii) head () iii) tail () iv) info ()

Exercise 2

3

Pandas Library: Visualization

- a) Write a program which use pandas inbuilt visualization to plot following graphs:
1. Bar plots ii) Histograms iii) Line plots iv) Scatter plots

Exercise 3

3

Write a Program to Implement Breadth First Search and Depth First Search using Python.

3

Exercise 4	
Write a program to implement Best First Searching Algorithm and heuristic search Algorithm	
Exercise 5	3
Write a python program to implement A* and AO* algorithm. (Ex: find the shortest path)	
Exercise 6	3
Write a Program to Implement Water-Jug problem using Python.	
Exercise 7	3
Write a Program to Implement Alpha-Beta Pruning using Python.	
Exercise 8	3
Write a Program to implement 8-Queens Problem using Python.	
Exercise 9	3
Write a program to schedule a meeting among a 5 busy people using Default Reasoning the output should give the time, place and day of the meeting.	
Exercise 10	3
Write a program to implement the Unification algorithm	
Exercise 11	3
Develop a knowledge base system consisting of facts and rules about some specialized knowledge domain	
Exercise 12	3
Write a program to implement 8 puzzle programs using different heuristics. Using it play the game Tic-Tac-Toe at the end the game the program should display the no. of nodes generated, cutoff values at each stage in the form of a table

Course Objectives:

This course will be able to

1. To be able to develop JAVA Program to access DATA from database.
2. Develop user interface applications.
3. Develop data persistence, messaging, location based services.

Course Outcomes:

At the end of the course, the student will be able to

1. Understand JavaFX GUI Programming Concepts.
2. Apply JavaFX Controls and event handling in GUI applications.
3. Understand and apply JDBC API to retrieve data from Data Base.
4. Understand and apply Servlets in server side programming.
5. Understand and apply JSPs in developing web applications.

Unit 1 Introduction JavaFX GUI Programming 10

JavaFX Basic Concepts -The JavaFX Packages, the Stage and Scene Classes, Nodes and Scene Graphs, Layouts, the Application Class and the Lifecycle Methods, Launching a JavaFX Application, A JavaFX Application Skeleton, Compiling and Running a JavaFX Program. A Simple JavaFX Control: Label, Using Buttons and Events - Event Basics, Introduction, Demonstrating Event Handling and the Button

Unit 2 Exploring JavaFX Controls 10

Exploring JavaFX Controls: Using Image and Image View, Toggle Button, Radio Button, CheckBox, ListView, ComboBox, TextField, ScrollPane, TreeView. Adding Tooltips, Disabling a Control. JavaFX Menus: Menu Basics, An Overview of MenuBar, Menu, and MenuItem. Create a Main Menu, Add Menu Items, Add Images to Menu Items

Unit 3 Java Database Connectivity 10

JDBC API: Introduction to JDBC API. System Requirements. Types of JDBC Drivers. Creating a Database Table-Oracle Database. Connecting to a Database. Setting the Auto-Commit Mode. Committing and Rolling Back Transactions, JDBC-Types-to-Java-Types Mapping. Knowing About the Database. Executing SQL Statements. Processing Result Sets. Making Changes to a ResultSet. Handling Multiple Results from a Statement. Connecting Java to relational databases (MySQL, PostgreSQL, etc.)

Unit 4 Introduction to Java Servlets 10

Introducing Servlets: Background, The Life Cycle of a Servlet. Servlet Development Options. Using Tomcat A Simple Servlet. Create and Compile the Servlet Source Code. Start Tomcat. Start a Web Browser and Request the The Servlet API: The javax.servlet Package. Reading Servlet Parameters. The javax.servlet.httpPackage. Handling HTTP Requests and Responses. Handling HTTP GET Requests. Handling HTTP POST Requests. Using Cookies .Session Tracking. Accessing Databases with JDBC using servlets.

Unit 5 Introduction to JSP**10**

JSP Basics: What's Wrong with Servlets? Running Your First JSP, How JSP Works, The JSP Servlet Generated Code, The Generated Servlet Revisited, Implicit Objects, JSP Syntax, Directives, Scripting Elements, Standard Action Elements, Comments. Developing JSP Beans: Calling Your Bean from a JSP Page, Accessing Properties Using `jsp:getProperty` and `jsp:setProperty`, Accessing Databases with JDBC using JSP

Prescribed Books:

1. JAVA The Complete Reference 9th edition, Herbert Schildt Oracle Press.
2. Java for the Web with Servlets, JSP, and EJB: A Developer's Guide to J2EE Solutions By Budi Kurniawan.

Reference Books:

1. Beginning java8 Apis extensions and libraries, Kishori Sharan, Apress.
2. Java 6 Programming, Black Book, Dreamtech.
3. Java Server Programming, Java EE6 (J2EE 1.6), Black Book, Dreamtech.
4. Advanced Java Technology, By M.T. Savaliya, Dreamtech.

Course Objectives:

This course aims to raise environmental awareness, promote sustainable practices aligned with the Sustainable Development Goals (SDGs), and highlight the significance of ecosystems and biodiversity. It sensitizes students to major pollution issues and related legislative measures, fosters ethical responsibility and problem-solving skills to tackle environmental challenges, and explains the impact of human population growth on the environment and public health. The course also emphasizes the role of education, information technology, and public policy in promoting environmental sustainability.

Course Outcomes:

At the end of the course, the student will be able to

1. Explain how natural resources should be utilised with a focus on sustainability.
2. Describe the need to protect ecosystems and biodiversity for future generations.
3. Comprehend major pollution problems related to ecosystems.
4. Summarize key environmental issues, sustainable practices, and laws supporting environmental protection in the context of sustainable development goals.
5. Explain the effects of population growth on environment and health, and the role of education, IT, and welfare programs in managing them.

Unit 1 Natural resources

7

Natural Resources: Renewable and non-renewable resources – Forest resources: Uses, deforestation – Water resources: Uses, floods, drought – Mineral resources: Uses, environmental effects of extracting mineral resources– Energy resources: Renewable and non-renewable energy sources (overview only).

Unit 2 Ecosystems, Biodiversity and its conservation

6

Ecosystems: Producers, consumers and decomposers – Food chains, food webs and ecological pyramids – Introduction, types, characteristic features, structure and functions of the following ecosystems: Forest ecosystem and lake ecosystem.

Biodiversity and its conservation: Definition – Values of biodiversity – Hot-spots of biodiversity – Threats to biodiversity – Conservation of biodiversity.

Unit 3 Environmental pollution

5

Definition, causes, effects and control measures of: Air pollution, Water pollution, Soil pollution, Marine pollution, Noise pollution, Thermal pollution, Nuclear hazards.

Self-learning: Genetically modified crops

Unit 4 Social issues and the Environment**6**

Sustainable development – Rainwater harvesting – Environmental ethics – Climate change, global warming, acid rain, ozone layer depletion – Air (Prevention and Control of Pollution) Act – Water (Prevention and Control of Pollution) Act – Wildlife Protection Act – Forest Conservation Act – Environment Protection Act.

Unit 5 Human population and the Environment**6**

Population explosion – Family welfare programmes – Environment and human health – Value education – Role of information technology in environment and human health, Field work – Visit to a local area to document environmental assets.
