Certification of Community Service Internship Completion

A total of 123 II B.Tech II Semester AI&ML students have successfully completed their Community Service Internship. These internships were carried out across various in-demand and socially relevant domains, ensuring complete alignment with the objectives of the Community Service Internship program. All internship reports submitted by students have been duly verified and found to be fully compliant with the prescribed guidelines and norms. Each student has successfully fulfilled the assigned tasks and responsibilities, demonstrating strong commitment, discipline, and professionalism. Their active participation reflects commendable dedication to community-oriented activities, practical learning, and the spirit of service. This certification not only validates the successful completion of their internship but also signifies their preparedness for future academic, personal, and professional growth.

The entire process highlights:

- The integrity and transparency of the internship program
- A consistent commitment to social contribution and skill development
- The institution's focus on fostering responsible and community-conscious individuals
- The successful execution of the Community Service Internship reaffirms the institution's dedication to experiential learning and holistic student development.

We sincerely thank the management and faculty of Annamacharya Institute of Technology and Sciences (AITS), Rajampet, for giving us this valuable opportunity to take part in the Community Service Internship. Your guidance and support have inspired us to serve society with responsibility and dedication.

Some more time has to be required for better explanation to farmers

.

Maybe the project should be conducted in students own villages , this should more likely be an interactive program with their village communities. Also they know their own surroundings problems and they resolve with some local support .

The projects intention you've provided is good but the ethical level students showed isn't appreciable as compared to other colleges how they are conducting this program .

This is not an comparison with our college with other institutions but we've gotta learn this kinda things from them and proper implementation methodologies.

A major concern you noticed is that many students aren’t able to present their project ideas properly. It’s not really their fault — the problem lies in how the program itself is organized, especially the batch formation system. When students are divided into groups, the work usually gets split like this:

Day 1: Photoshoot

Person 1: Documentation
Person 2: Asking strangers for photos
Person 3: (Maybe data collection or survey work?)
Person 4: (Probably making the presentation or editing part)

Because of this divided work, no one gets a full understanding of the whole project. If each student did their project individually, they'd take complete responsibility for it — from planning to execution to presentation. This would not only make the results more genuine but also help them improve their communication and presentation skills in a real way.

HAVE A GREAT DAY.
